EXPOSURE

A photographic memoir
GREG WEIGHT

- **December release!**
- **The first fine art memoir published by Piper Press**
- **Includes a foreword by artist Lin Utzon and endorsement from Reg Mombassa**

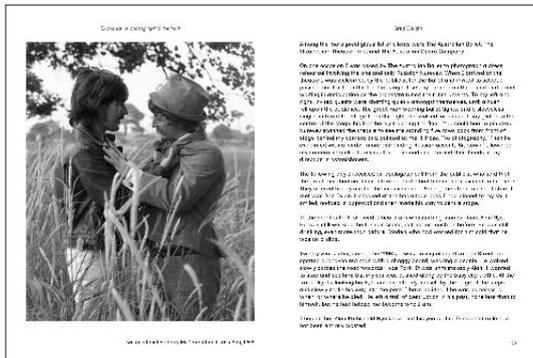

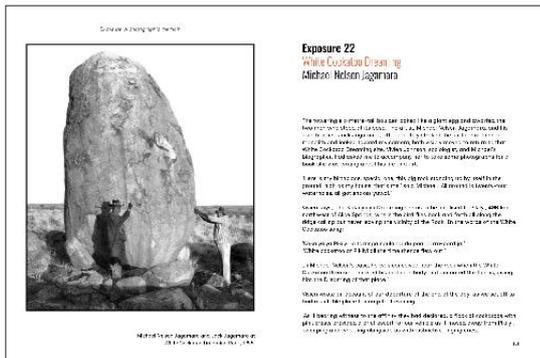

Exposure: A Photographic Memoir is an intimate journey through Australia's bohemian art world, told by acclaimed photographer Greg Weight, whose lens has captured some of the nation's most iconic artists and cultural moments over the past five decades.

With wit and candour, Weight shares his encounters with Martin Sharp, Brett Whiteley, Reg Mombassa, Emily Kame Kngwarreye, Johnny Bell, John Olsen, Garry Shead, Margaret Olley, Luke Sciberras, Tracey Moffatt, Jeffrey Smart and others, bringing them to life in personal, often poignant settings. All the while, his own personal journey is revealed.

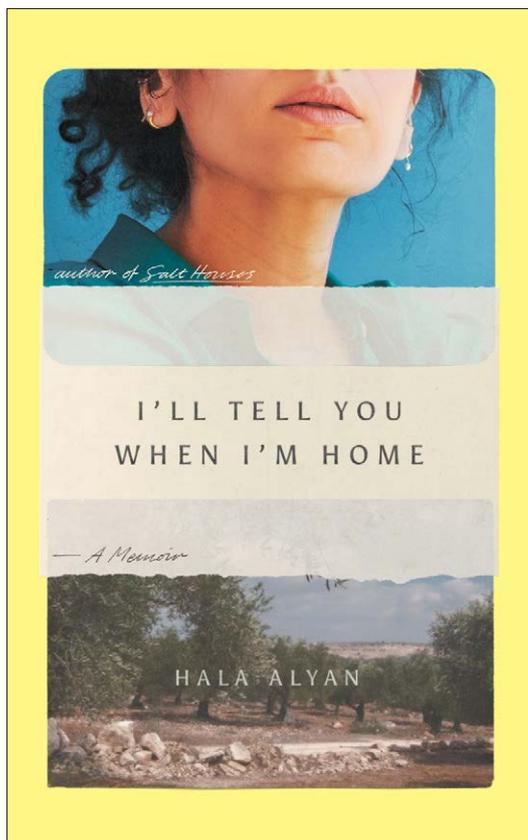

Trusted by artists to photograph both their portraits and their work, Weight became an artist in his own right, with John Olsen describing his gift as capturing 'the Weight moment'. This book is a beautifully produced memoir accompanied by over 65 photographs – some iconic, others never before seen.

Through award-winning portraits and landscapes, he reveals not only the likeness but the psyche of each subject, creating a vivid chronicle of Australia's art scene from the 1960s to the 2000s: its immense talent, tragedies, absurdities and hilarities. Playful, candid and revealing, this memoir takes readers to the front row of Sydney's creative world.

From his childhood discovery of light and shadow to formative years with Martin Sharp, The Yellow House collective and the Sydney Push, Weight's story unfolds in thirty-six 'exposures' – chapters echoing the frames of a roll of film.

‘A beautiful and intimate memoir of a life in the embrace of stories, Alyan weaves the fine threads of torn and fragmented lives into an irresistible, intergenerational tapestry. I was spellbound from the first page.’ – Naomi Klein

I'LL TELL YOU WHEN I'M HOME

A Memoir

HALA ALYAN

- Combines the emotional urgency of surrogacy and loss with the universal themes of identity and belonging
- Will resonate with readers of bestselling literary memoirs like *In the Dream House* and *Good Talk*
- Anticipated and relevant work from an award-winning Palestinian-American novelist with a devoted following
- Has received early praise from acclaimed writers like Naomi Klein and adrienne maree brown, alongside coverage in major press outlets

At first, Hala's baby is the size of a poppyseed. Then a grain of rice, then a lime. After years of trying for a baby, with one miscarriage followed by another, Hala watches from afar as her daughter grows in the body of another woman, in another country.

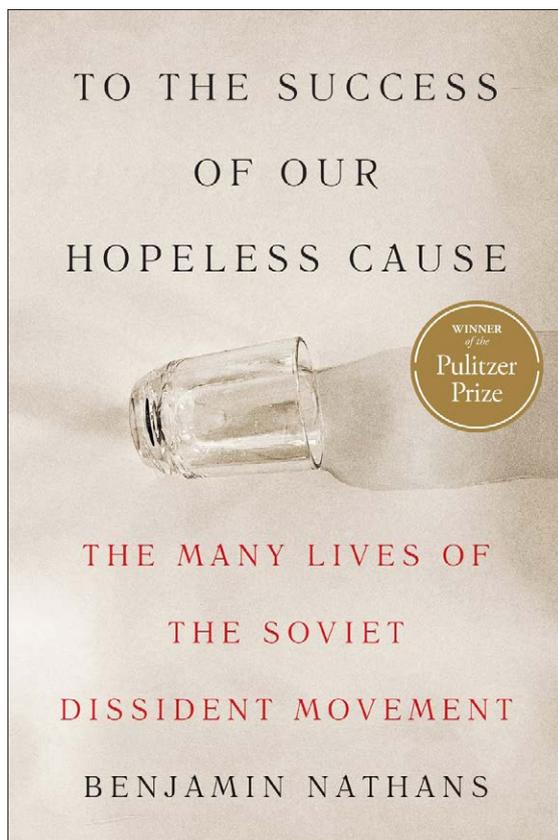

Hala is not just awaiting news from the surrogate. She is also holding her breath as Palestine and Lebanon, her estranged homelands, are under fire. She goes for long runs to distract herself. She remembers family stories of grandmothers mapping their lives through a tangle of borders; of eradicated villages, invading armies and places of refuge that proved only temporary; of men who left, women who stayed, and the legacies passed down from one to another. Hala decides to name her unborn child Leila, a thread connecting her daughter to *The Thousand and One Nights* and the women who save by storytelling.

A stunningly lyrical and honest quest for motherhood and peoplehood, *I'll Tell You When I'm Home* is a powerful story of unravelling and becoming, of destruction and redemption, and of homelands lost and recreated.

‘A roaring cyclone of memory and imagination and harrowing tribulation. Surrogacy as metaphor for exile. Exile not as a dream for a better life, but as concession, a begrudging necessity. Gaza, San Miguel, Beirut, New York, Damascus – traveling with Alyan’s prose is a thrill. *I'll Tell You When I'm Home* feels as rich and supersaturated as contemporary consciousness itself – I can't stop talking about it.’ – Kaveh Akbar

‘Gorgeously written and compelling, *I'll Tell You When I'm Home* connects the threads of personal and family histories as its author prepares for motherhood. Hala Alyan is a writer of astounding talent.’ – Lisa Ko

‘A book about a past time that is very much a book for our time...A story from which we all stand to learn as we face a new wave of authoritarianism.’ – Los Angeles Review of Books

TO THE SUCCESS OF OUR HOPELESS CAUSE

The Many Lives of the Soviet Dissident Movement
BENJAMIN NATHANS

- **Now in paperback!**
- ***To the Success of Our Hopeless Cause* shows how dissidents spearheaded the struggle to break free of the USSR’s totalitarian past, a struggle that continues in Putin’s Russia – and that illuminates other struggles between hopelessness and perseverance today**

****Winner, Pulitzer Prize 2025****

****Winner, Pushkin House Russian Book Prize 2025****

A ‘riveting history’ (*Wall Street Journal*) of the Soviet dissident movement, which hastened the end of the USSR and still provides a model of opposition in Putin’s Russia – and beyond.

Beginning in the 1960s, the Soviet Union was unexpectedly confronted by a dissident movement that captured the world’s imagination. Demanding that the Kremlin obey its own laws, an improbable band of Soviet citizens held unauthorised public gatherings, petitioned in support of arrested intellectuals, and circulated banned samizdat texts. Soviet authorities arrested dissidents, subjected them to bogus trials and vicious press campaigns, sentenced them to psychiatric hospitals and labour camps, sent them into exile – and transformed them into martyred heroes. Against all odds, the dissident movement undermined the Soviet system and hastened its collapse. Taking its title from a toast made at dissident gatherings, *To the Success of Our Hopeless Cause* is a definitive history of a remarkable group of people who helped change the twentieth century.

Benjamin Nathans’s vivid narrative tells the dramatic story of the men and women who became dissidents – from Nobel laureates Andrei Sakharov and Alexander Solzhenitsyn to many others who are virtually unknown today. Drawing on diaries, memoirs, personal letters, interviews, and KGB interrogation records, *To the Success of Our Hopeless Cause* reveals how dissidents decided to use Soviet law to contain the power of the Soviet state. This strategy, as one of them put it, was ‘simple to the point of genius: in an unfree country, they began to conduct themselves like free people.’

An extraordinary account of the Soviet dissident movement, *To the Success of Our Hopeless Cause* shows how dissidents spearheaded the struggle to break free of the USSR’s totalitarian past, a struggle that continues in Putin’s Russia – and that illuminates other struggles between hopelessness and perseverance today.

- **Author appearances expected at a range of festivals around Australia**

A curated collection of writings over the past half-century from the acclaimed professor of politics and gay rights activist.

From the publication of his pivotal first book, *Homosexual: Oppression and Liberation*, in 1971, Dennis Altman AO has been a leading voice in gay liberation movements in Australia and beyond. Across a career spanning more than 50 years, Altman has written about gay rights alongside other currents in Australian politics and society, identifying cultural shifts and exploring their impacts, as well as US politics, including under Trump. His books, including *Homosexual* and *Queer Wars*, are being embraced by a new generation of queer theorists worldwide, with editions in multiple languages.

This collection of his favourite non-fiction has been ordered chronologically to capture the sense of Australia as it was and as it is, charting the course of a conversation about civil rights and cultural change, while at the same time illuminating the persistence of prejudice. Interspersed with personal essays reflecting on Altman’s cultural heritage, grief and ageing, *Writing My World* is a powerful and illuminating chronicle.

Praise for *Unrequited Love* by Dennis Altman:

LIBERALISM AS A WAY OF LIFE
 ALEXANDRE LEFEBVRE

- **New edition in B format!**
- **Why liberalism is all you need to lead a good, fun, worthy, and rewarding life – and how you can become a better and happier person by taking your liberal beliefs more seriously**

Where do you get your values and sensibilities from? If you grew up in a Western democracy, the answer is probably liberalism. Conservatives are right about one thing: liberalism is the ideology of our times, as omnipresent as religion once was. Yet, as Alexandre Lefebvre argues in *Liberalism as a Way of Life*, many of us are liberal without fully realising it – or grasping what it means. Misled into thinking that liberalism is confined to politics, we fail to recognise that it’s the water we swim in, saturating every area of public and private life, shaping our psychological and spiritual outlooks, and influencing our moral and aesthetic values – our sense of what is right, wrong, good, bad, funny, worthwhile, and more. This eye-opening book shows how so many of us are liberal to the core, why liberalism provides the basis for a good life, and how we can make our lives better and happier by becoming more aware of, and more committed to, the beliefs we already hold.

A lively, engaging, and uplifting guide to living well, the liberal way, *Liberalism as a Way of Life* is filled with examples from television, movies, stand-up comedy, and social media – from *Parks and Recreation* and *The Good Place* to the Borat movies and Hannah Gadsby. Along the way, you’ll also learn about seventeen benefits of being a liberal – including generosity, humour, cheer, gratitude, tolerance, and peace of mind – and practical exercises to increase these rewards.

You’re probably already waist-deep in the waters of liberalism. *Liberalism as a Way of Life* invites you to dive in.

‘As liberalism increasingly comes under attack from both the left and the right, Alexandre Lefebvre mounts a deep and stirring defense, steeped in intellectual history and tied to contemporary culture. Lefebvre emphasises the great joys and benefits that come from embracing reciprocity, freedom, and fairness, to live liberally; and he develops a set of spiritual exercises through which we can learn to succeed at liberalism as a way of life. This is philosophical self-help of the highest order – a literally extraordinary book.’ – Daniel Markovits, author of *The Meritocracy Trap*

About the author:

Alexandre Lefebvre is professor of politics and philosophy at the University of Sydney. His books include *Human Rights as a Way of Life*.

‘Alexandre Lefebvre’s brilliant book brings to light an important dimension of liberalism that is hidden, as it were, in plain sight. Liberalism is not only a procedural, political, or legal concept, but also a moral – and even spiritual – one that serves as a guide for social transformation. Given the dire situation that liberalism faces around the world today, this message is especially important, and the book deserves a wide readership.’ – Helena Rosenblatt, author of *The Lost History of Liberalism*

THE FIRST KING OF ENGLAND

Æthelstan and the Birth of a Kingdom

DAVID WOODMAN

- Beautifully illustrated and breathtaking in scope, *The First King of England* is the most comprehensive, up-to-date biography of Æthelstan available, bringing a magisterial richness of detail to the life of a consequential British monarch whose strategic and political sophistication was unprecedented for his time

From one of today's leading historians of the early medieval period, an enthralling chronicle of Æthelstan, England's founder king whose achievements of 927 rival the Norman Conquest of 1066 in shaping Britain as we know it.

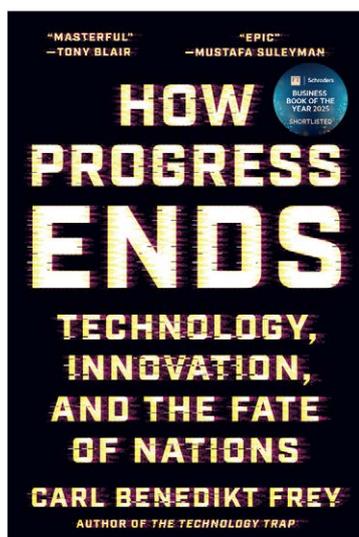

The First King of England is a foundational biography of Æthelstan (d. 939), the early medieval king whose territorial conquests and shrewd statesmanship united the peoples, languages, and cultures that would come to be known as the 'kingdom of the English'. In this panoramic work, David Woodman blends masterful storytelling with the latest scholarship to paint a multifaceted portrait of this immensely important but neglected figure, a man celebrated in his day as much for his benevolence, piety, and love of learning as he was for his ambitious reign.

The First King of England sheds new light on Æthelstan's early life, his spectacular military victories and the innovative way he governed his kingdom, his fostering of the church, the deft political alliances he forged with Europe's royal houses, and his death and enduring legacy.

HOW PROGRESS ENDS

Technology, Innovation, and the Fate of Nations
CARL BENEDIKT FREY

- How 1,000 years of global history show why technological and economic progress is often followed by stagnation and even collapse

****Shortlisted, *Financial Times* and Schroders, 2025, Business Book of the Year Award****

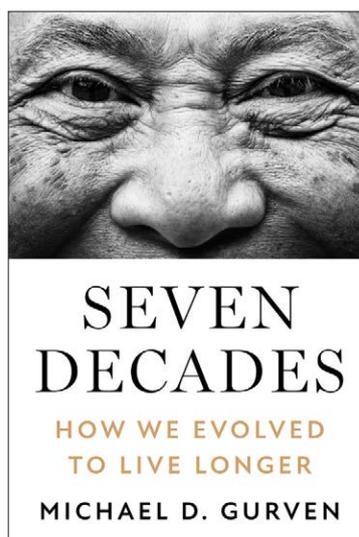

In *How Progress Ends*, Carl Benedikt Frey challenges the conventional belief that economic and technological progress is inevitable. For most of human history, stagnation was the norm, and even today progress and prosperity in the world's largest, most advanced economies – the United States and China – have fallen short of expectations. To appreciate why we cannot depend on any AI-fuelled great leap forward, Frey offers a remarkable and fascinating journey across the globe, spanning the past 1,000 years, to explain why some societies flourish and others fail in the wake of rapid technological change.

By examining key historical moments – from the rise of the steam engine to the dawn of AI – Frey shows why technological shifts have shaped, and sometimes destabilised, entire civilisations. He explores why some leading technological powers of the past – such as Song China, the Dutch Republic, and Victorian Britain – ultimately lost their innovative edge, why some modern nations such as Japan had periods of rapid growth followed by stagnation, and why planned economies like the Soviet Union collapsed after brief surges of progress.

SEVEN DECADES

How We Evolved to Live Longer
MICHAEL D. GURVEN

- An anthropologist uncovers new evidence for the evolutionary origins of human longevity – and explains why growing old is an opportunity, not a burden

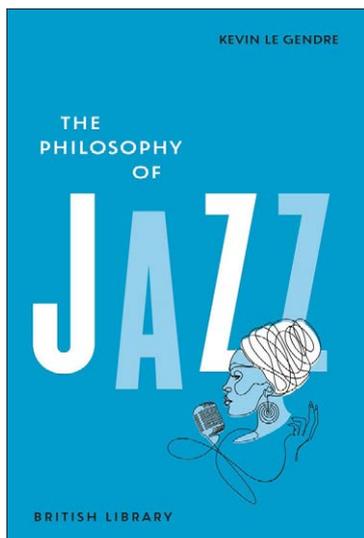

Our ability to live for decades may seem like a modern luxury made possible by clean water and advances in medicine. In fact, human longevity is a legacy of our unique evolutionary path as a species. *Seven Decades* challenges the belief that life in the past was 'nasty, brutish, and short', tracing how our capacity for long life came to be and transforming how we think about aging.

Blending vivid storytelling with cutting-edge science, anthropologist Michael Gurven weaves tales from his years of field experience among Indigenous societies whose diet and traditional lifeways are closer to how we all lived prior to industrialisation, demonstrating how these communities are relatively free of the chronic diseases of aging such as heart disease, dementia, and diabetes. He provides compelling evidence that our longevity first evolved among our hunting and gathering ancestors and shows how the human body was built to last around seven decades. At a time when people are more likely to live to old age than ever before, Gurven discusses how we can harness this amazing evolutionary feat through a shift in societal values, one that balances self-reliance with interdependence, nurtures multigenerational ties, prioritises women's health and longevity, and enables us to rediscover the wisdom of our elders.

KEVIN LE GENDRE

- Reflects on the re-vitalisation and vibrancy of the jazz scene, an ideal gift book for lovers of this genre of music
- Written by an expert on the jazz scene, drawing on a wide range of sources

Kevin Le Gendre brings his considerable knowledge and experience to *The Philosophy of Jazz*, interpreting the mindset, outlook and ambition of the jazz musician and a form of music that has captured the imagination of international audiences for over a century.

This is not a straight history of this genre of music but an exploration of what it means to be a jazz musician and the alchemy between players and audience during a live-music session. While drawing on historical references, in terms of cultural touchstones in Black music and the Black experience, this fascinating book very much immerses itself in the current jazz scene and the interesting directions being explored. Along the way the greats of jazz are all covered – Joplin, Morton, Billie, Miles and Monk along with their influence and legacy.

WITCHES

A King's Obsession

STEVEN VEERAPEN

- A major book on a subject of perennial interest – the witch hunting of James VI and I
- Written by one of Britain's finest young historical writers, and author of the bestselling *The Wisest Fool*
- Compelling narrative history which will appeal to the general reader, lovers of historical biography and fans of Philippa Gregory, Alison Weir and Antonia Fraser with its vivid and absorbing style

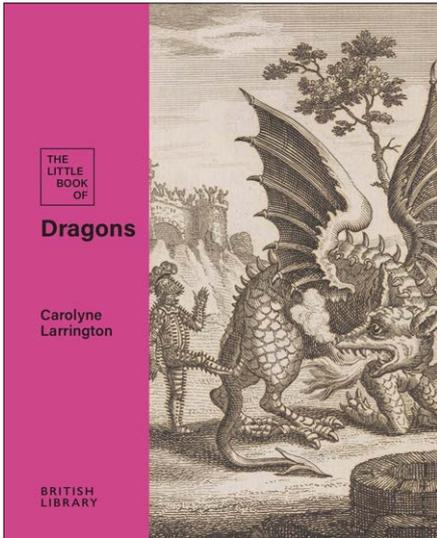

Witches – whether broomstick-riding spell-casters or Wiccan earth-worshippers – have been culturally relevant for centuries. For centuries, too, belief in the potency of witchcraft has been debated, accused witches have been hunted and punished, and film and TV productions have brought the witch and the witch-hunter to big and small screens.

But where did our perception of witches – good and bad – come from? What motivated wide-scale panics about witchcraft during certain periods? How were alleged witches identified, accused, and variously tortured and punished?

Steven Veerapen traces witches, witchcraft, and witch-hunters from the explosion of mass-trials under King James VI and I in the late sixteenth century to the death of the witch-hunting phenomenon in the early eighteenth century.

THE LITTLE BOOK OF DRAGONS
CAROLYNE LARRINGTON

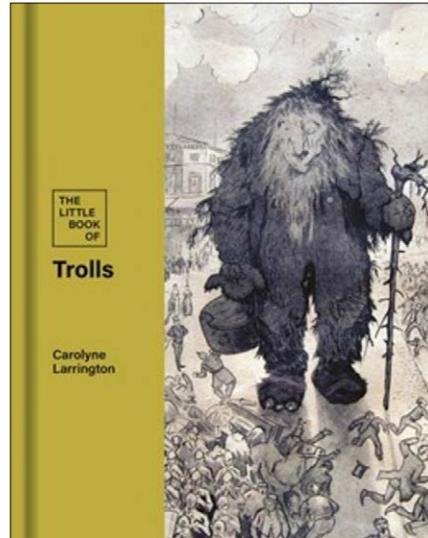

- Illustrated with over 40 art pieces from the British Library’s collections
- An authoritative guide, written by a leading scholar in medieval literature and mythology
- Retellings of beloved and lesser-known dragon legends from around the world

Whether they breathe fire from above, spit poison on the land, or cause churning maelstroms in the sea, dragons can be found lurking in the margins of illuminated legend around the world. Their global ubiquity means they have many guises: primordial chaos-monsters to the ancients, wise and auspicious guardians in East Asian tradition, formidable foes to be slain by saints and knights, comic companions in 19th-century children’s literature, and stand-ins for aerial warfare in modern fantasy.

The history of dragons is as slippery and twisting as their serpentine bodies; they are creatures constantly doubling back on themselves, shedding their dead skins for new, and coiling around our landscapes.

THE LITTLE BOOK OF TROLLS
CAROLYNE LARRINGTON

- Covering the earliest legends of trolls, through to blockbuster movies and the internet troll, *The Little Book of Trolls* explores the fascinating history of one of folklore’s most complicated creatures
- An authoritative guide, written by a leading scholar in Old Norse literature and mythology
- Retellings of beloved and lesser-known troll tales are presented alongside beautiful historic illustrations and artwork

Trolls have escaped from the black lava wastes of Iceland and the dense pine forests of Scandinavia to take on a new life in the collective global imagination. They may not steal goats and eat people quite so much, but they remain disruptive and dangerous, even if their limited imaginations sometimes make them comic and even quite likeable.

Emerging from Scandinavian mythology, trolls are contradictory creatures: fleshy in their desires but turning to stone in sunlight, as large as slumbering mountains or small enough to help you with your washing, charmingly charmless or genuine threat. They lurk in pine forests and peat bogs, overrunning homesteads, abducting princesses and generally nagging society with their troublesome presence.

Immortalised in the artworks of Theodor Kittelsen, John Bauer and Erik Werenskiold, this beautiful little book follows their journey from the dense forests of Norway to Middle-earth.

- *Runes of Light* is a multidimensional exploration of the runes intended to establish openness and flow

Runes of Light is a multidimensional exploration of the runes intended to establish openness and flow. Through the symbols, this is a journey to commune with our deep unconscious, with the understanding that all answers are found in nature and that true knowledge arises by reconnecting to the depths of our inner being.

The runes are an ancient alphabetical system of writing and a sacred system of cosmology for understanding the order of how consciousness evolves.

THE POISONED ARROW
A Toltec Guide to Overcoming Fear
DON MIGUEL RUIZ JR.

- From the bestselling author of *The Mastery of Self*, *The Five Levels of Attachment*, and many more beloved books of Toltec wisdom
- The author’s books have been translated into over 20 different languages
- This is a timely book for a world steeped in fear and anxiety

The poison is fear – this book is the cure.

When the world wounds us with a metaphorical arrow, many of us spend our days chasing unanswerable questions: *Why was I hurt? Who is to blame? Will it happen again?* Beneath these restless inquiries lies a deeper truth: even though the event is now over, the fear it left behind is like a poison. It courses through our veins – whispering doubts, weaving prisons from old wounds, and painting the world in shades of threat and scarcity.

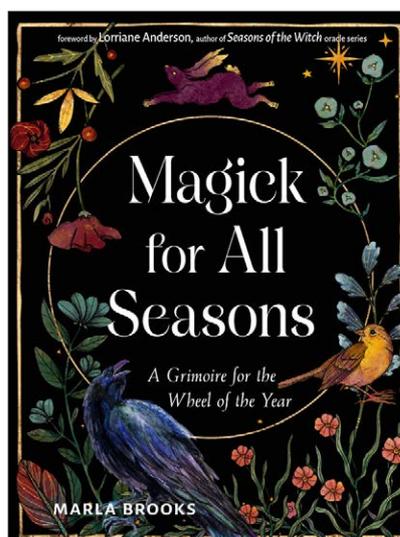

But there is an antidote.

In this transformative guide to overcoming fear, beloved Toltec teacher don Miguel Ruiz Jr. invites you to remove both the arrow and its poison.

With prose as tender as it is incisive, this book is not a map – it is a mirror. Look closely, and you may find that the antidote was always within you.

PISSING WOMEN
 SOPHY RICKETT

- **Featuring essays and interviews from musician St Vincent, poet Eileen Myles and more, *Pissing Women* explores the exploration of female identity**

Pissing Women, visual artist and photographer Sophy Rickett’s influential series of portraits of women pissing in public, caused a storm in the art world in 1994. Now, thirty years later, these era-defining images are reproduced with testimonies from the writers, musicians, artists and creatives on whose work they have had a profound influence.

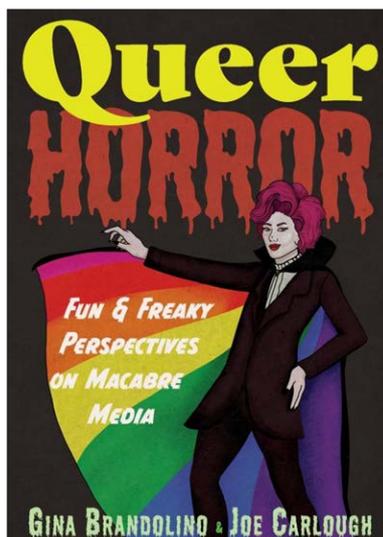

Featuring positioning essays from and interviews with musician St Vincent, poet Eileen Myles, artist Chila Burman, choreographer Holly Blakey, filmmaker Sophie Fiennes, actor Lily Cole, comedian Sophie Duker, photographer Juno Calypso and more, Rickett’s pioneering exploration of female identity, memory and the upheaval of the post-Thatcher years is revisited here – and remains as remarkable in the 21st century as it did three decades ago.

‘Part desire...part social commentary, Rickett mixes the comic with the seditious. Forget your better judgment and head for high rise enlightenment.’ – **TimeOut**

- **Queerness and horror go hand in hand, whether films/characters are clearly queer or tacitly coded, because the genre’s foundation is built on fear of the unknown, fear of strangers and otherness, and threats to normalcy – things that society has historically used to vilify or ostracise LGBTQIA+ people**

HOW THE UNITED STATES WOULD FIGHT CHINA

The Risks of Pursuing a Rapid Victory
FRANZ-STEFAN GADY

- Suggests that America’s military and society are ill-prepared for a US-China conflict across multiple domains
- Reveals that the US lacks a viable blueprint, the military forces or industrial capacity for a long war of attrition
- Author has advised US and European militaries on the future of high-intensity warfare

Assesses the substantial risk of strategic defeat for Washington in any war with China.

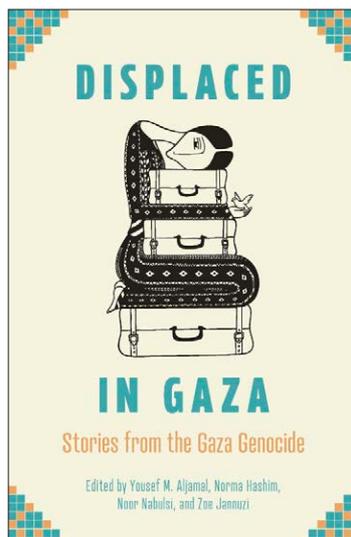

This is a detailed analysis of how the United States intends to fight a war against the People’s Republic of China and why it risks strategic defeat – based on its doctrine, force structure and general ‘way of war’. Franz-Stefan Gady contends that the US military’s current approach to a potential war over Taiwan is flawed, relying heavily both on achieving rapid information superiority and on a decisive victory. This is unlikely to succeed, and may increase the risk of nuclear escalation between the world’s only genuine superpowers.

A US-China war would more likely be characterised by prolonged attrition across multiple domains (cyber, space, air, sea and land) – a conflict for which America’s military and society are ill-prepared.

GOETHE

A Life in Ideas

MATTHEW BELL

- A new intellectual biography of Goethe, examining the paradox of his thought
- Matthew Bell is professor of German and comparative literature at King’s College London

Johann Wolfgang von Goethe (1749-1832) was a poet, a novelist, a scientist and an essayist on a dizzying range of topics. In the nineteenth century, he was widely regarded as one of the most important thinkers of modern Europe. In this important and ambitious work, Matthew Bell offers a wide-ranging intellectual biography of Goethe, tracing the evolution of his thought and reassessing its value. Bell examines the full spectrum of Goethe’s writing, from his most well-known works, including the dramatic poem *Faust* and the novels *Wilhelm Meister* and *The Sorrows of Young Werther*, to lesser-known essays and reviews. Throughout, Bell draws on Goethe’s letters and diaries, most of which are still only available in German, embedding Goethe’s thought in his lived experience and in the cultural and intellectual life of Europe from the 1750s to the 1830s.

Bell presents new interpretations of Goethe’s work as one of the first evolutionary biologists, describing discoveries that anticipated Darwin’s, and of his political ideas, which pervade his literary work in ways that have not been fully recognised.

HORSES

A 4,000-Year Genetic Journey Across the World
 LUDOVIC ORLANDO, TRANSLATED BY TERESA LAVENDER FAGAN

- Blending panoramic storytelling with cutting-edge genetic science, *Horses* chronicles an unbreakable bond that was forged thousands of years ago on the windswept Eurasian Steppe, one that heralded a bold new era in the human drama – that of speed

From one of today’s leading experts on ancient DNA, a sweeping genetic history that unravels the mystery of where horses were first domesticated.

Ludovic Orlando garnered world acclaim for helping to rewrite the genomic history of horse domestication. *Horses* takes you behind the scenes of this ambitious genealogical investigation, revealing how he and an international team of scientists discovered the elusive origins of modern horses. Along the way, he shows how the domestication of the horse changed the trajectory of civilisation – with benefits and unforeseen consequences for the animals themselves.

Orlando brought together world-class experts in genomics, archaeology, and the history of peoples, languages, and migrations. Comparing the DNA of ancient horses to the genomes of dozens of modern horse breeds, these researchers reconstructed millennia of equine evolutionary history.

FOLLOWING THE BEND

How to Read a River and Understand Its Nature
ELLEN WOHL

- Sharing a new understanding of how rivers function as both physical systems and ecosystems, *Following the Bend* enables us to observe rivers with fresh eyes and more fully appreciate the beauty, vibrancy, and complexity of our planet’s vital waterways

An engaging and thought-provoking introduction to river science.

When we look at a river, either up close or while flying over a river valley, what are we really seeing? *Following the Bend* takes readers on a majestic journey by water to find answers, along the way shedding light on the key concepts of modern river science, from hydrology and water chemistry to stream and wetland ecology.

In this accessible and uniquely personal book, Ellen Wohl explains how to ‘read’ a river, blending the latest science with her own personal experiences as a geologist and naturalist who has worked on rivers for more than three decades. She charts how water travels through the hydrologic cycle around the globe and downstream to distribute energy, move sediment, and shape river channels, and how living organisms adapt to life in flowing water to create vibrant river ecosystems. Wohl looks at the role of disturbances such as floods and droughts and discusses how geologists interpret the sedimentary records of past river processes.

THE WEIRDNESS OF THE WORLD

ERIC SCHWITZGEBEL

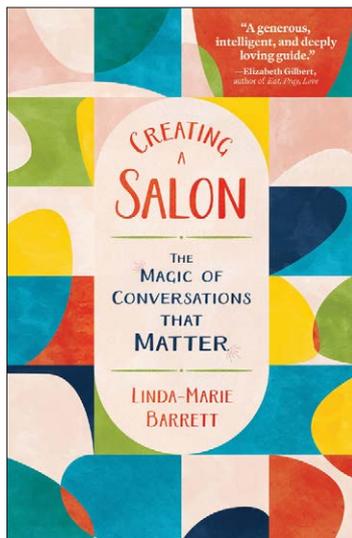

- How all philosophical explanations of human consciousness and the fundamental structure of the cosmos are bizarre – and why that’s a good thing

Do we live inside a simulated reality or a pocket universe embedded in a larger structure about which we know virtually nothing? Is consciousness a purely physical matter, or might it require something extra, something nonphysical? According to the philosopher Eric Schwitzgebel, it’s hard to say. In *The Weirdness of the World*, Schwitzgebel argues that the answers to these fundamental questions lie beyond our powers of comprehension. We can be certain only that the truth – whatever it is – is weird. Philosophy, he proposes, can aim to open – to reveal possibilities we had not previously appreciated – or to close, to narrow down to the one correct theory of the phenomenon in question. Schwitzgebel argues for a philosophy that opens.

According to Schwitzgebel’s ‘Universal Bizarreness’ thesis, every possible theory of the relation of mind and cosmos defies common sense. According to his complementary ‘Universal Dubiety’ thesis, no general theory of the relationship between mind and cosmos compels rational belief. Might the United States be a conscious organism – a conscious group mind with approximately the intelligence of a rabbit? Might virtually every action we perform cause virtually every possible type of future event, echoing down through the infinite future of an infinite universe?

SANDERLING

ANNE WEBER, TRANSLATED BY NEIL BLACKADDER

- The past lies before us as a foreign, distant land. *Sanderling* is a personal journey of exploration into the past, and the fascinating world of Florens Christian Rang (1864-1924), written by his great grand-daughter Anne Weber, one of Germany’s leading contemporary authors

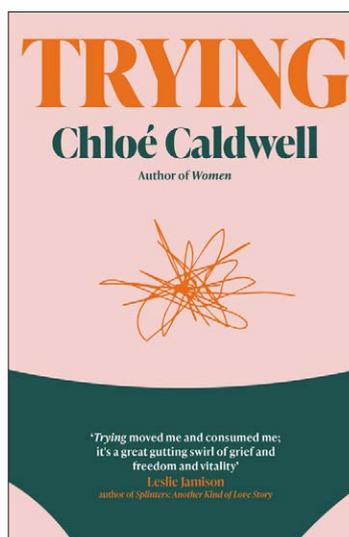

Rang, whom Weber nicknames Sanderling after the darting shorebird, began as a Protestant pastor stationed near Poznan in modern-day Poland, then part of Prussia. The church, which he subsequently abandoned, had a mission to ‘Germanise’ the local population. Weber draws parallels between this apparently benign ambition and the subsequent murderous intent of the Third Reich.

After his apostasy Sanderling became friends with several great early-twentieth-century thinkers, including Walter Benjamin, Hugo von Hofmannsthal and Martin Buber. It was during this time he joined a group of writers, artists and philosophers with whom he hoped to create a utopian society. Later on, his own son – Weber’s grandfather – became a Nazi.

With literary and philosophical references including Sontag, Sebald and Nietzsche, Weber combines her family history with a broader examination of ethics and morality to create a travel diary through time, reaching back to understand her ancestors.

TRYING

CHLOÉ CALDWELL

- Powerful, personal and gloriously irreverent, Caldwell’s ‘memoir in real time’ is an unflinching look at a transitional moment in her life and creativity. Caldwell distills her experience with fertility treatment, a troubled marriage and embracing her queerness into a dynamic and punchy narrative perfect for contemporary readers

Everyone loves a story about people who beat the odds. But what about those who didn’t?

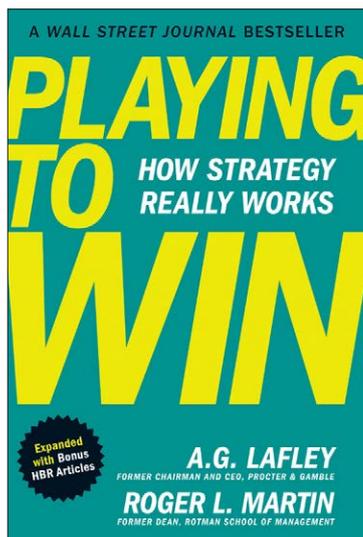

In the years she spent hoping to conceive a child with her husband, Chloé Caldwell consumed everything she could find on infertility. No matter the book or reddit forum, her experiences seemed absent amid stories of IVF and miracle babies.

Bouncing between her job at a boutique selling ‘life-changing pants’ and the fertility clinic offering ‘innovative ways to create your family’, Caldwell ignored the sense that something else in her life was wrong – until she extracted a confession from her husband.

'[We Have Never Been Woke] announces [al-Gharbi] as a rising intellectual star.'

ON GASLIGHTING KATE ABRAMSON

- **Now in paperback!**
- **A philosopher examines the complicated phenomenon of gaslighting**

'Gaslighting' is suddenly in everyone's vocabulary. It's written about, talked about, tweeted about, even sung about (in 'Gaslighting' by The Chicks). It's become shorthand for being manipulated by someone who insists that up is down, hot is cold, dark is light – someone who isn't just lying about such things, but trying to drive you crazy. The term has its origins in a 1944 film in which a husband does exactly that to his wife, his crazy-making efforts symbolised by the rise and fall of the gaslights in their home. In this timely and provocative book, Kate Abramson examines gaslighting from a philosophical perspective, investigating it as a distinctive moral phenomenon.

Gaslighting, Abramson writes, is best understood as a form of interpersonal interaction, a particular way of fundamentally undermining someone. The gaslighter, Abramson argues, aims to make his target experience herself as incapable of reasoning, perceiving, or reacting in ways that would allow her to form appropriate beliefs, perceptions, or emotions in the first place. He seeks not only to induce in her this unmoored sense of herself but also to make it a reality. Using examples and analysis, Abramson gives an account of gaslighting and its immorality, and argues that such a discussion can help us understand other aspects of social life – from racism and sexism to the structure of interpersonal trust.

WE HAVE NEVER BEEN WOKE The Cultural Contradictions of a New Elite MUSA AL-GHARBI

- **Now in paperback!**
- **A powerful critique, *We Have Never Been Woke* reveals that only by challenging this elite's self-serving narratives can we hope to address social and economic inequality effectively**

Society has never been more egalitarian – in theory. Prejudice is taboo, and diversity is strongly valued. At the same time, social and economic inequality have exploded.

In *We Have Never Been Woke*, Musa al-Gharbi argues that these trends are closely related, each tied to the rise of a new elite – the symbolic capitalists. In education, media, nonprofits, and beyond, members of this elite work primarily with words, ideas, images, and data, and are very likely to identify as allies of antiracist, feminist, LGBTQ, and other progressive causes. Their dominant ideology is 'wokeness' and, while their commitment to equality is sincere, they actively benefit from and perpetuate the inequalities they decry. Indeed, their egalitarian credentials help them gain more power and status, often at the expense of the marginalised and disadvantaged.

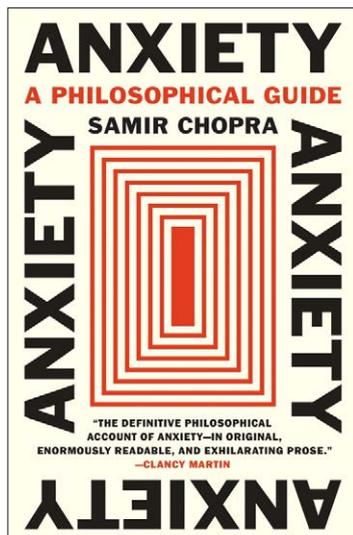

A powerful critique, *We Have Never Been Woke* reveals that only by challenging this elite's self-serving narratives can we hope to address social and economic inequality effectively.

ANXIETY
A Philosophical Guide
SAMIR CHOPRA

- **Now in paperback!**
- **Personal, poignant, and hopeful, *Anxiety* is a book for anyone who is curious about rethinking anxiety and learning why it might be a source not only of suffering but of insight**

How philosophy can teach us to be less anxious about being anxious by understanding that it's an essential part of being human.

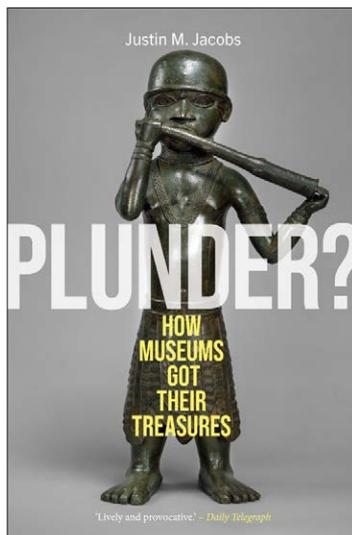

Today, anxiety is usually thought of as a pathology, the most diagnosed and medicated of all psychological disorders. But anxiety isn't always or only a medical condition. Indeed, many philosophers argue that anxiety is a normal, even essential, part of being human, and that coming to terms with this fact is potentially transformative, allowing us to live more meaningful lives by giving us a richer understanding of ourselves. In *Anxiety*, Samir Chopra explores valuable insights about anxiety offered by ancient and modern philosophies – Buddhism, existentialism, psychoanalysis, and critical theory. Blending memoir and philosophy, he also tells how serious anxiety has affected his own life – and how philosophy has helped him cope with it.

Personal, poignant, and hopeful, *Anxiety* is a book for anyone who is curious about rethinking anxiety and learning why it might be a source not only of suffering but of insight.

PLUNDER?
How Museums Got Their Treasures
JUSTIN M. JACOBS

- **Now in paperback!**
- **A provocative reassessment of a popular narrative that connects museums, the antiquities trade, and theft**

In this thought-provoking new work, historian Justin M. Jacobs challenges the widely accepted belief that much of Western museums' treasures were acquired by imperialist plunder and theft.

The account re-examines the allegedly immoral provenance of Western collections, advocating for a nuanced understanding of how artefacts reached Western shores. Jacobs examines the perspectives of Chinese, Egyptian and other participants in the global antiquities trade over the past two and a half centuries, revealing that Western collectors were often willingly embraced by locals. This collaborative dynamic, largely ignored by contemporary museum critics, unfolds a narrative of hope and promise for a brighter, more equitable future – a compelling reassessment of one of the institutional pillars of the Enlightenment.

In her classic book *The Global City*, Saskia Sassen tells how New York, London, and Tokyo became command centres of the global economy and, in the process, underwent massive and parallel changes. The book remakes the way we think about cities in the global economy and continues to provide lessons for the future.

THE TECH COUP

How to Save Democracy from Silicon Valley

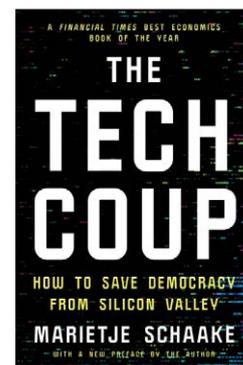

MARIETJE SCHAAKE

- **An insider offers a ‘forceful critique...of Big Tech’s steady erosion of democracy’ (*The New Yorker*) and describes what must be done to stop it**

Over the past decades, under the cover of ‘innovation’, technology companies have successfully resisted regulation and have even begun to seize power from governments themselves. Facial recognition firms track citizens for police surveillance. Cryptocurrency has wiped out the personal savings of millions and threatens the stability of the global financial system. Spyware companies sell digital intelligence tools to anyone who can afford them. This new reality – here unregulated technology has become a forceful instrument for autocrats around the world – is terrible news for democracies and citizens.

In *The Tech Coup*, Marietje Schaake offers a behind-the-scenes account of how technology companies crept into nearly every corner of our lives and our governments.

HOW WOMEN BECAME POETS

A Gender History of Greek Literature

EMILY HAUSER

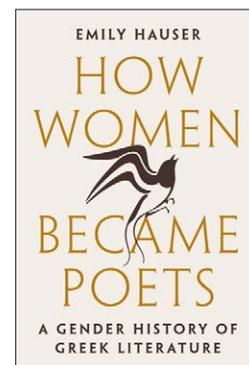

- Hauser reinserts women into the traditionally all-male canon of Greek literature, arguing for the centrality of their role in shaping ideas around authorship and literary production

How the idea of the author was born in the battleground of gender.

When Sappho sang her songs, the only word that existed to describe a poet was a male one – *aoidos*, or ‘singer-man’. The most famous woman poet of ancient Greece, whose craft was one of words, had no words with which to talk about who she was and what she did. In *How Women Became Poets*, Emily Hauser rewrites the story of Greek literature as one of gender, arguing that the ways the Greeks talked about their identity as poets constructed, played with, and broke down gender expectations that literature was for men alone.

‘Provocative...A brilliant book.’

WHAT'S ON HER MIND

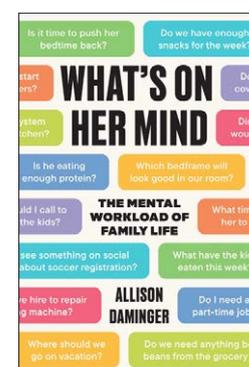

The Mental Workload of Family Life

ALLISON DAMINGER

- The mental labour that keeps families afloat – and why women do most of it

Mothers and fathers use their time differently, with women spending roughly twice as many hours on family labour as men. But what about the gendered differences in the ways women and men think? *What's on Her Mind* provides an illuminating look at the cognitive labour that families depend on and reveals why this essential aspect of family life is disproportionately handled by women – even in couples that aspire to practice equality.

While most accounts of household labour centre on how people use their time, Allison Daminger focuses on a less visible and less easily quantifiable aspect of family life. She introduces readers to the concept of cognitive labour – anticipating, researching, deciding, and following up – and shows how women in different-gender couples do most of this critical work.

RUGBY WAS F***ING BETTER WHEN...

A Guide to the Modern Game

- Paul Williams has 75K followers on Twitter and is a regular feature writer for RugbyPass, the URC website and *Rugby World* magazine
- His previous book, *Rugby Has F***ing Laws* has sold more than 9,000 copies

According to legend and a cursory look at Google, rugby was created in 1823. When William Webb Ellis allegedly picked up the ball, and ran with it, rugby was born. How true this is, we don't know. But what we can almost guarantee is that no matter how the game started, even after just one day of the sport being invented, some people will have said that it was better in the f***ing old days.

Hilarious, off-beat and (surprisingly) insightful, this is the perfect gift for rugby fans all around the world.

A HANDFUL OF SAND

The Gurindji Struggle, After the Walk-Off

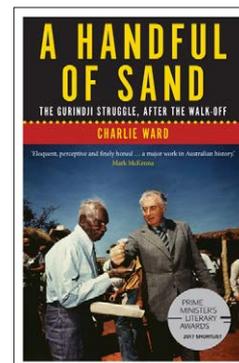

CHARLIE WARD

- **Reprint available now!**

****Shortlisted, Prime Minister's Literary Awards 2017, Australian History****

****Shortlisted, Chief Minister's Northern Territory 2017, History Book Award****

Fifty years ago, a group of striking Aboriginal stockmen in the remote Northern Territory of Australia heralded a revolution in the cattle industry and a massive shift in Aboriginal affairs. Now, after many years of research, *A Handful of Sand* tells the story behind the Gurindji people's famous Wave Hill Walk-off in 1966 and questions the meanings commonly attributed to the return of their land by Gough Whitlam in 1975. Written with a sensitive, candid, and perceptive hand, *A Handful of Sand* reveals the path Vincent Lingiari and other Gurindji elders took to achieve their land rights victory, and how their struggles in fact began, rather than ended, with Whitlam's handback.

What We Get Wrong and How to Do Better

MYISHA CHERRY

- **Now in paperback!**
- **Philosopher Myisha Cherry teaches us the right ways to deal with wrongdoing in our lives and the world**

Sages from Cicero to Oprah have told us that forgiveness requires us to let go of negative emotions and that it has a unique power to heal our wounds. THE CRISIS OF CULTURE

Identity Politics and the Empire of Norms

OLIVIER ROY

- Now in paperback!
- Puts current societal fractures under the microscope
- Roy argues that our only hope is to restore social bonds at the grassroots level

Are we confronting a new culture – global, online, individualistic? Or is our existing concept of culture in crisis, as explicit, normative systems replace implicit, social values?

Olivier Roy's new book explains today's fractures via the extension of individual political and sexual freedoms from the 1960s. For Roy, twentieth-century youth culture disconnected traditional political protest from class, region or ethnicity, fashioning an identity premised on repudiation rather than inheritance of shared history or values.

Fascists such as Richard Spencer interpret science fiction films and literature as saying only white men have the imagination required to invent a high-tech future. Other white nationalists envision racist utopias filled with Aryan supermen and all-white space colonies. *Speculative Whiteness* traces these ideas through the entangled histories of science fiction culture and white supremacist politics, showing that debates about representation in science fiction films and literature are struggles over who has the right to imagine and inhabit the future. Although fascists insist that tomorrow belongs to them, they have always been and will continue to be contested by antifascist fans willing to fight for the future.

SYDNEY

A biography

LOUIS NOWRA

In *Sydney*, acclaimed playwright and writer Louis Nowra – author of *Kings Cross* and *Woolloomooloo* – expands his gaze to explore the energy, beauty, vulgarity, dynamism and pulsating sense of self-importance of his adopted city. This big, bustling portrait of Sydney is told through a cast of criminals and premiers, ordinary folk, entertainers, artists, thieves and visionaries.

'Nowra captures the everchanging spirit of what is arguably – to most, inarguably to Nowra – Australia's pre-eminent city.' – *Books+Publishing*

OUR STREETS

The Regional Cities and Major Towns Project
 NATIONAL LIBRARY OF AUSTRALIA, FOREWORD BY TIM ROSS

- A nostalgic collection of iconic styles of buildings, businesses and streetscapes from regional towns around Australia – swimming pools to RSLs and post offices

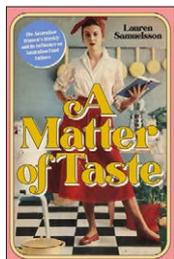

The modernist RSL club, the Art Deco cinema, the stilted Queenslander or the elaborate Edwardian. The iconography of Australia's regional towns is familiar to many of us, whether we live, work and play in these places, or just journey through. A distinctive Australian architecture has developed, less glamorous or coherent than the grand public buildings in the capital cities, but no less classic or important to our sense of identity.

The images in this book are a snapshot of the Australian town, from Warrnambool to Broome, captured by the National Library of Australia's photographers in the 1990s.

A MATTER OF TASTE

The Australian Women's Weekly and Its Influence on Australian Food Culture
 LAUREN SAMUELSSON

- By the 1980s, a history of the magazine claimed that most families would have 'sat down to a meal prepared from a *Women's Weekly* recipe'. This book explores the *Weekly's* connections with the food habits of everyday Australians

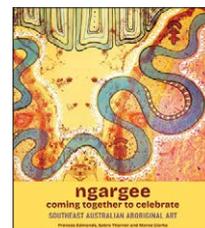

Drawing on recipes, food editorials and readers' memories, *A Matter of Taste* is a celebration of the *Weekly's* vital role in the development of Australian food culture, debunking the myth that Australian food was 'bland' and 'boring' prior to postwar migration, and illuminating important relationships between food, culture and identity.

ORSTRALIA

A Punk History 1974–1989
 TRISTAN CLARK

- With appeal to more than just punk history obsessives, *Orstralia* offers an unprecedented snapshot of an under-acknowledged segment of Australian life and history

Far from punk's more modish North Atlantic core in the late 1970s, discontented youth in Australia were enacting similar musical and cultural reckonings. Yet in spite of the Australia's purported 'laid-back' national demeanour, punks there were routinely met with insult, fist, or the police baton.

Based on over 130 interviews, *Orstralia* documents the most renowned to the most fleeting and obscure acts the nation produced.
