

WHEN WORDS FAIL US

Truth beyond time

STAN GRANT

- **In this philosophical book, Stan Grant, one of Australia's most recognisable journalists and authors, takes on the crucial issue of why we struggle to talk to one another today**
- **This gift-sized hardback is the perfect present for Mother's Day**
- **Includes foreword by Scott Stephens, head of ABC religion and ethics online and host of The Minefield on Radio National**

I am out of words at home. I have grown bored with my language, bored with my voice, bored with my writing. My words labour under the weight of Australia's history. The land itself, as much as I love it, bears down hard.

Now in another place, I am finding lighter words. At times, I may not need to speak at all. I smile; I nod. I seek permission to speak. Please, do you mind? Will you allow me?

In an important book for our times, Stan Grant – one of Australia's most prominent writers about identity, nationhood and belonging – reflects on how we struggle to speak to one another today, and the importance of listening, silence and philosophy, from Plato to Simone Weil to Radiohead.

In 2025, Stan Grant delivered the Simone Weil lectures at the Australian Catholic University, the most prestigious philosophy lectures on the Australian calendar, founded by Prof Raimond Gaita in 2000.

This book is a distillation of those two lectures as well as a third 'Truth Beyond Time', given at Federation University. It explores how and why we are at a point where, as Albert Camus lamented, 'the long human dialogue is at an end'. Inspired by French philosopher, mystic and political activist Simone Weil's life and thought, it reflects on the limits of poetry, on what Plato called charlatanism that imitates speech and on the beauty of music that does what words cannot.

THE VANISHING WILD

Australian wildlife and the fight against extinction
JUSTINE E. HAUSHEER

- Beautifully written, *The Vanishing Wild* will take you on the road with intrepid science journalist Justine E. Hausheer as she crouches in spinifex in Central Queensland, wades through rice paddocks in the Riverina, seeks out Tasmanian devils near Cygnet, watches a platypus paddle downstream in suburban Brisbane and searches for cane toads in Kakadu to see the work of conservation scientists first hand
- Australia has nearly 2000 species listed as threatened, and nearly 100 endemic species have gone extinct since European colonisation – the threats to our wildlife are well understood, and yet species continue to decline. *The Vanishing Wild* captures the current state of Australian wildlife conservation, as well as the hope for the future
- This book captures conservation at its best – absurd and hilarious, frustrating, intriguing, punctuated by both sorrow and joy – to share the stories of incredible native species, their ecosystems, and world-leading science

‘I’m listening for a ghost. Bright green and yellow, with a tail striped like a bumble-bee, it crouches in wait as the sun sinks below the escarpment...’

Australia is a country celebrated for its wildlife, and yet native species are in crisis. In the last 200 years, Australia has lost more biodiversity than any other developed nation.

In this book, Justine E. Hausheer encounters the pygmy possums that live high in the Snowy Mountains, hears the booming calls of bitterns from their adopted home in the Riverina’s rice fields, crouches after dark in the spinifex grasslands listening for the elusive night parrot, and meets the adorable fat-tailed dunnarts who might hold the answers to reviving the Tasmanian tiger.

The Vanishing Wild shows us the harsh reality of the extinction crisis – as well as the future of conservation and what can be done to save Australia’s native species.

John Keane is Professor of Politics at the University of Sydney and is renowned globally for his creative thinking about politics, history, media and democracy. DEMAGOGUES AND DESPOTS

Democracies on the brink

JOHN KEANE

- **John Keane is an internationally acclaimed thought leader on politics, history, media and democracy**
- **A timely, insightful look at global threats to democracy and what can be done to protect it**
- **Supported with an extensive publicity and sales campaign**

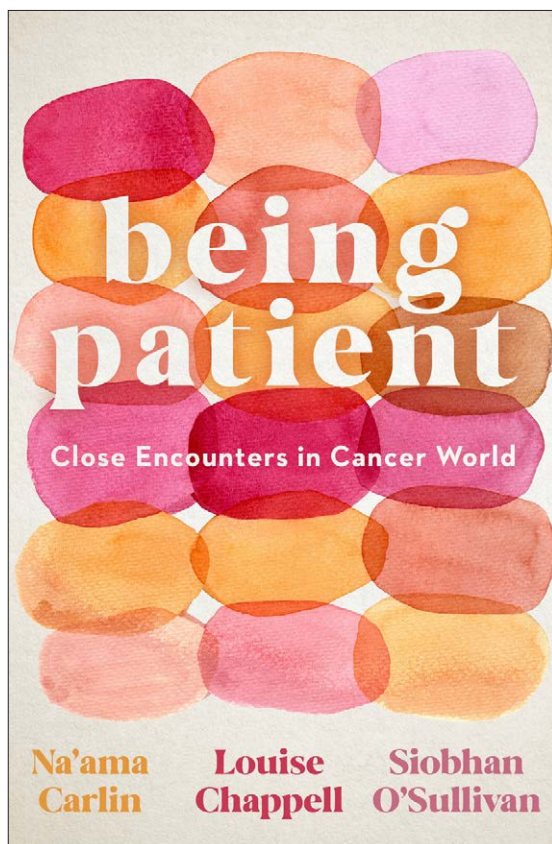

Democracy and despotism live closer together than you'd expect. Acclaimed political thinker John Keane reveals why that should alarm us all.

We live in troubled times, marked by a sinister trend gaining the upper hand everywhere: the triumph of despotism not only in countries like Russia, Iran and Saudi Arabia, but also in states run by popularly elected demagogues – Orbán and Erdogan, Netanyahu and Trump.

John Keane shows why this new despotism defies the laws of political gravity. Instead of relying on fear or raw force, it fosters a strange, pseudo-democratic type of government, led by rulers skilled in winning public loyalty through government handouts, election-rigging, legal trickery, weaponised lying and talk of enemies. And, alarmingly, these leaders hunt in packs.

What's so good about democracy? Keane explains that it's much more than popular self-government based on free and fair elections. Democracy is a collective insistence that unaccountable power is always dangerous – and that it's the best way to stop demagogues and despots from ruining life on our planet.

BEING PATIENT

Close Encounters in Cancer World

NA'AMA CARLIN, LOUISE CHAPPELL, SIOBHAN O'SULLIVAN

- **On what is often a very lonely and stressful journey, *Being Patient* gives voice to both the people who are undergoing cancer treatment and the medical professionals who treat them**
- **While there are practical resources available and various cancer memoirs, there are no other Australian books like this one**
- **The authors are experienced media performers and well-connected in Cancer World**

Na'ama Carlin, Louise Chappell and Siobhan O'Sullivan all received the diagnosis people dread – cancer. Working in universities, these three women knew how to speak up. But in Cancer World, their voices were often unheard. As they negotiated medical hierarchies, 'scanxiety', gender bias, ongoing treatments and confronting diagnoses, they met others who felt the same.

In *Being Patient*, Na'ama, Louise and Siobhan share their own stories and talk to people about their experiences as patients and carers in Cancer World. Including stories from cancer experts – nurses, surgeons, radiologists, oncologists and researchers – *Being Patient* is unflinching and uplifting and offers unvarnished views of living with cancer from 'both sides of the desk'.

THE BOOK THAT TAUGHT THE WORLD TO ORGASM AND THEN DISAPPEARED

Shere Hite and *The Hite Report*

ROSA CAMPBELL

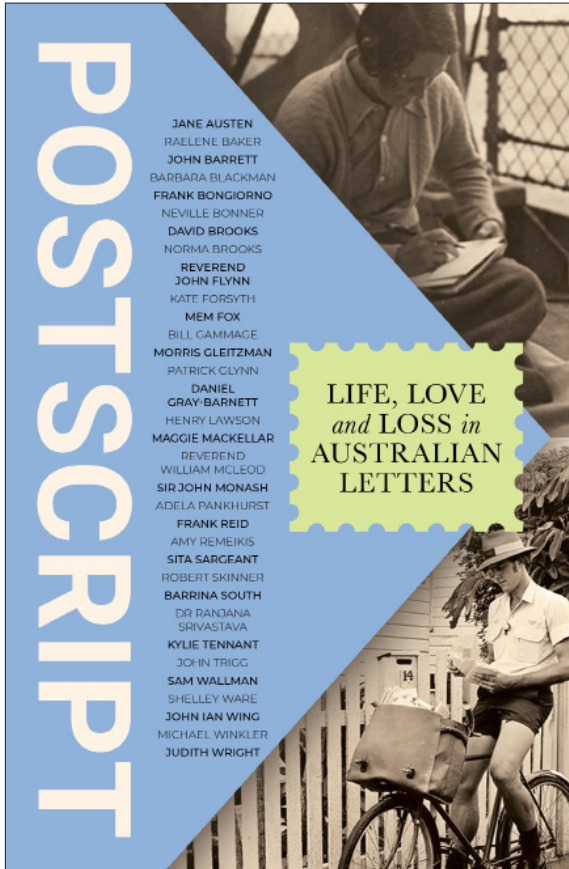

- Shere Hite's first book, *The Hite Report*, caught global attention in 1976 with the claim that most women were 'wildly sexually dissatisfied' and sold over 50 million copies worldwide – it is the thirtieth-best-selling book of all time
- Based on original research, including looking into the thousands of letters Hite received from suburban women, men in prison, factory workers, and oil rig employees – changing the story we tell about feminism
- Holds Hite accountable for her blind spots, drawing out Black women's experiences she didn't foreground, showing that good sex requires not just feminism but a world without racism
- A confident debut from Australian feminist historian Rosa Campbell, simultaneously published by Melville House in the US and UK
- As we face current global backlash against feminism, Shere Hite's story (and forgotten legacy) offers insight into how backlashes work, the price women pay, and helps us take back what is ours

Meet Shere Hite – the feminist hero whose notorious work revolutionised how we think about sex, marriage, and the female orgasm...

Despite being one of the leading thinkers of the second wave feminist movement, today Shere Hite is little known, little written about, and, unsurprisingly, little read. Her groundbreaking book, *The Hite Report*, was the first feminist exploration of the link between sex and male power. It sold millions of copies when first published in 1976 and revolutionised the way people thought about marriage and the female orgasm. How, then, did it, and Hite, disappear from public consciousness?

Australian historian Rosa Campbell combines original research and sharp cultural analysis to explore the complicated life and literary legacy of Shere Hite. Expanding on her ideas about sex – namely, that sex is sexist – the book explores Hite's fraught childhood, struggles working in the porn industry, and eventual cancellation by the far-right Evangelical movement. All the while, Campbell holds Hite and *The Hite Report* to account for their own failings and absence of intersectionality.

In a post-MeToo world, with the far-right on the march globally, *The Book that Taught the World to Orgasm and then Disappeared's* examination of shifting ideological movements is essential to understanding both the current feminist movement, as well as how conservative and reactionary efforts can silence even the most successful of women.

The National Library of Australia holds millions of letters in its collections: love letters, reports on scientific discoveries, impassioned pleas, newsy notes about the week that’s just been, responses from politicians to members of the electorate, letters to the editor and so many more.

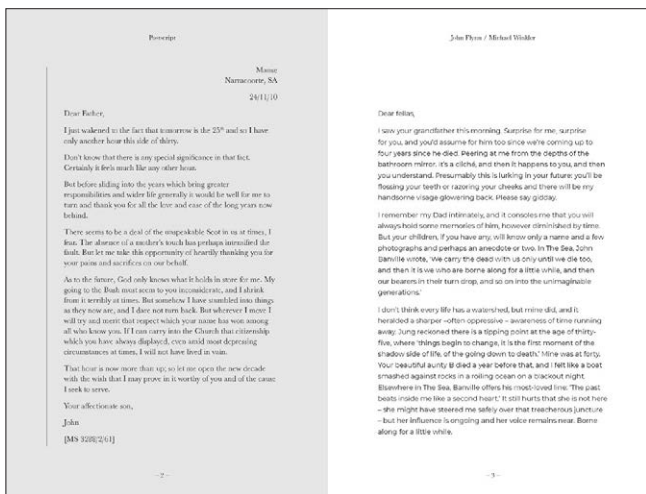

We’ve made a selection of remarkable letters from those millions, and passed them on to modern Australians to write new letters, inspired by those from our collection.

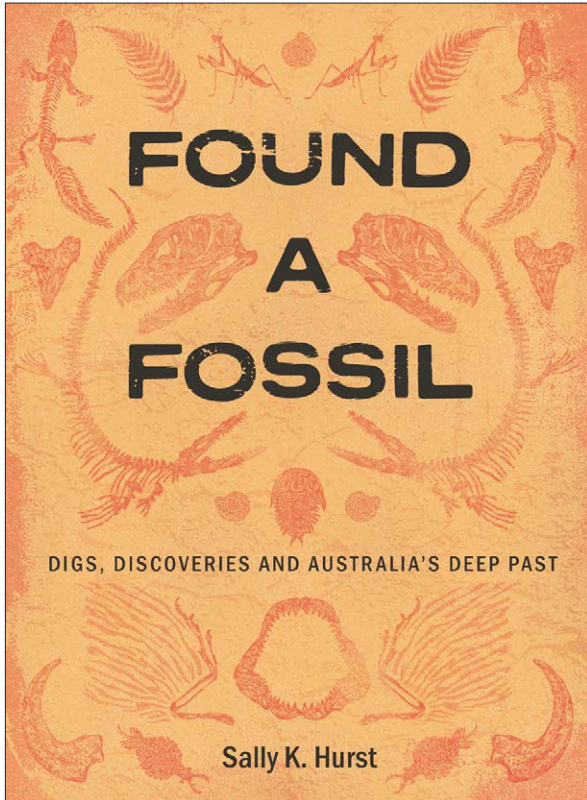

The original letters may have shaped history, confessed love, covered philosophical matters like aging or creativity, or given an insight into the writers’ lives. The modern letters do the same. By turns moving, funny and challenging, this is a collection of letters that will engage and enlarge readers’ sense of empathy – and may inspire them to pick up the pen themselves. This book is a testament to the particular power of a letter (or an email, fax or telegram) to shock us, to move us and to warm us.

Authors include: Jane Austen, Raelene Baker, John Barrett, Barbara Blackman, Frank Bongiorno, Neville Bonner, David Brooks, Norma Brooks, Reverend John Flynn, Kate Forsyth, Mem Fox, Bill Gammage, Morris Gleitzman, Patrick Glynn, Daniel Gray-Barnett, Henry Lawson, Maggie Mackellar, Reverend William McLeod, Sir John Monash, Adela Pankhurst, Frank Reid, Amy Remeikis, Sita Sargeant, Robert Skinner, Barrina South, Dr Ranjana Srivastava, Kylie Tennant, John Trigg, Sam Wallman, Shelley Ware, John Ian Wing, Michael Winkler, Judith Wright

UNSUNG HEROES OF POLLINATION

More Than the Birds and the Bees

PETER BERNHARDT

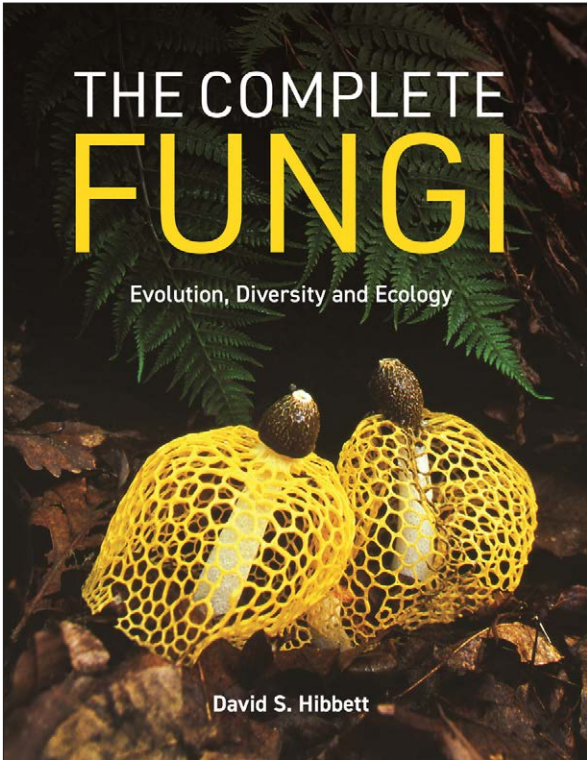

- Tells the story of pollinators and flowers over evolutionary time
- Extraordinary photographs of pollinators in action, giving you a unique view of nature
- Come to know a cast of scientists and pollination sleuths, and the importance of citizen science
- Brings iconic species to life through pollination networks
- Empowers readers to better understand the process of natural selection

Unsung Heroes of Pollination shows the reader a hidden world of pollination, where flies, wasps, mosquitoes, bats and beetles take centre stage. Naturalists, gardeners, citizen scientists and flower enthusiasts are invited to journey into the undergrowth, following Professor Peter Bernhardt and a cast of scientists across Australia, the USA, South Africa, China and Fiji.

Leaving the familiar birds and bees behind, Bernhardt uncovers stories of reward, cooperation and deception between plants and animals. The author also pays homage to an earlier generation of naturalists who first investigated these unusual relationships during the first half of the 20th century. He explores how flowers have evolved in structure and function, and how pollination systems have emerged and diversified over time. Discover the remarkable 'fit' between animal senses and floral signals, and see how flowers advertise their secret rewards. Stunning colour plates bring you face-to-face with overlooked pollinators and their flowers – from an amber fossil of the bee-like crabronid wasp that flew millions of years ago, and a modern chloropid gnat wearing an orchid's pollinia on its back, to the elaborate lip petals of hammer orchids luring male wasps, and the long tongue of a tube-lipped nectar bat reaching for its prize.

This is a captivating glimpse into the wonders of an unseen – and unsung – world.

PEAKING

One Hundred and Eleven Days on Two Wheels
SASKIA BEUDEL

- **Inspiring true story of a woman taking on Australia's toughest one-day cycling event in her late fifties**
- **Explores ageing, strength and reinvention with honesty and intelligence**
- **Speaks directly to women navigating midlife and beyond; timely in an era of renewed interest in women's sport and active ageing**
- **Fresh perspective on a male-dominated endurance sport**
- **Set against the dramatic landscape of the Victorian High Country**
- **Connects physical endurance with questions of meaning, pleasure and mortality**
- **Relevant to cyclists, runners, triathletes and ultra-endurance fans alike, strong crossover appeal between sports, memoir and nature writing audiences**
- **Written by an accomplished literary author with a devoted readership**
- **Ideal for book clubs, festivals, author talks and community cycling groups**

We're sitting around a wood stove as she tells these stories. There's a gale force wind outside, forest heaving. Another woman in the group ran the New York marathon a few years ago. 'I wouldn't do Peaks,' she says. 'It's beyond a marathon, more like an ultra-marathon. You'll be on the bike all day, maybe eleven hours.' She'd run the marathon in just over five.

The three peaks are Tawonga Gap, Mt Hotham and Falls Creek in the Victorian high country. Organisers describe the Peaks Challenge as the most demanding one-day cycle event in Australia – the ultimate personal challenge. In her late fifties, Saskia Beudel decided to take that challenge.

Peaking is her genre-defying record of the hundred and eleven days spent preparing for Peaks – and of the event itself. An accomplished writer of both fiction and non-fiction, Saskia weaves together her training notes and wide-ranging reflections, the history of the bicycle and her own personal stories of cycling. She tussles with the state of contemporary life and the questions that come after long hours in the saddle.

What does it mean for a woman to enter this male-dominated event? As our bodies age, what new things can we ask of them? How do we take pleasure from our bodies and nature at a time when the world seems to be collapsing around us? How far can body – and mind – respond? Ultimately, what does it mean to 'peak' (or not)?

'Loss', wrote Marcus Aurelius, 'is nothing else but change'. We lose face, lose time, lose heart, lose touch, lose ground, lose our keys (often); we can lose the things that hold us back or weigh us down, just as we can lose the people and places we love most. Loss, whether it offers us pain or reward, is fundamental to the experience of being human. What might we lose or gain as technology continues its rapid advance? How do we halt the loss of our natural world? What's lost by growing up between cultures? Are we losing our sense of a shared reality? And what are the benefits to being a loser?

Lose yourself in this edition of *Griffith Review* as we go in search of answers.

About the author:

Hideko Yamashita was inspired by the yogic philosophy of *dan-ko* (refusal), *sha-ko* (disposal), and *ri-ko* (separation) during her student years. Drawing from this, she developed Danshari as a practical, self-help method for decluttering your life – both physically and emotionally. Today, she shares the message of Danshari through her many books, tv appearances, radio, magazine and newspaper interviews, and online media. Her books have sold over 7 million copies and inspired people of all ages, backgrounds and walks of life to transform not only their homes, but their lives. This is her first book in English.

‘Meet Japan’s original decluttering guru (no, not that one)! Before Marie Kondo stormed into the global consciousness, Hideko Yamashita taught Japan the art of creating tidier spaces.’
 – *The New York Times* (January 16, 2025)

DANSHARI

The Japanese Art of Decluttering Your Space to Transform Your Life
 HIDEKO YAMASHITA

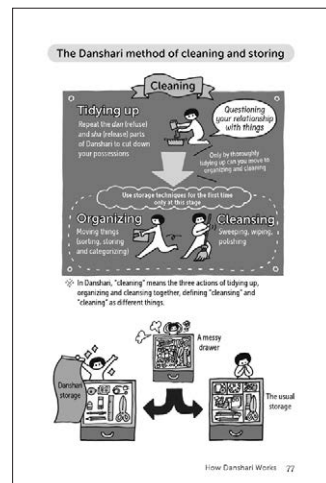

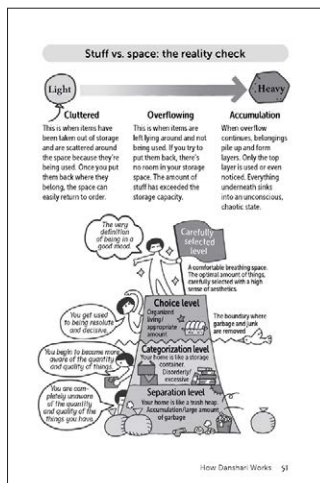

- **This is Japan’s original decluttering book by Hideko Yamashita – the self-help pioneer who developed the revolutionary Danshari method for reducing stress and achieving peace of mind**
- **Yamashita’s books have sold over 7 million copies in Japan, transforming lives and inspiring an entire movement along the way! This is her first book in English. Danshari offers more than just a tidier home – it’s a way to improve your life by decluttering your surroundings, making better choices and creating healthier, more fulfilling relationships**
- **Packed with inspiring real-life stories, this book shows how millions of ordinary people have used the Danshari method to unlock extraordinary change – and how you can too!**

Japan’s original decluttering guru, Hideko Yamashita, first developed her decluttering method known as Danshari over two decades ago. Danshari is much more than just ‘a way to tidy up’. Yes, you’ll feel refreshed once your surroundings are in order – but that’s just the beginning!

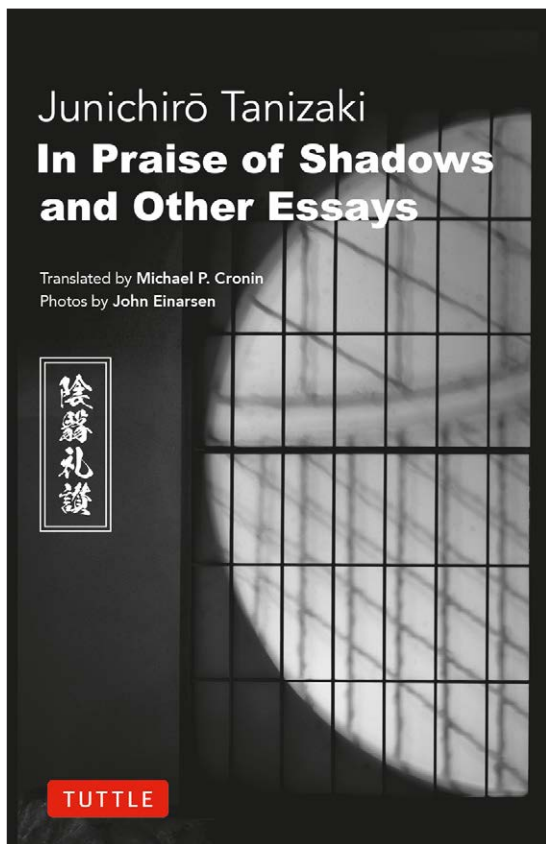

At its heart, Danshari is about release. It’s about removing what no longer serves you emotionally as well as physically. Discarding clutter frees you from outdated beliefs and emotional burdens that are holding you back. The word Danshari literally means ‘reduce, release and relieve’ – or, in other words, lightness, clarity and freedom.

This isn’t just about throwing out old stuff. It’s about creating space in your life for clarity, peace and joy with other people. Whether it’s stressing about money, difficult relationships, family expectations or the fear of aging – Danshari offers you a way forward!

This is far more than a guide to cleaning up your house. It’s a roadmap to a whole new life!

Hanshin Observations *Hanshin kōbunroku* 1925

Osakans are the kind of people who, as a matter of course, allow their children to situate on the floor while riding a train. Tokyoites will be surprised to hear this, but I assure you I am not exaggerating. I have seen such a spectacle twice. What is more surprising, both incidents occurred not on an inner-city train but on the Hanshin Railway, which is purported to be the line with the most genteel ridership in the Osaka region.

The first time was on a train packed with passengers returning from a performance at Takarazuka of *Dōjō*, featuring Kitagawa. Hanging from a strap, I heard the sound of someone urinating "above me." At the same time, I felt some liquid running against my face. That's strange, I thought to myself, and then, over the heads of several people in the dark and crowded train, I noticed a young mother crouching down and holding a child of three or four. Apart from the unquestionable rudeness of the mother, what surprised me was that neither the train conductor nor the other passengers scolded her or even indicated by their expression any disapproval, but cringing like that in such a packed car was inconsiderate enough, and everyone in the immediate vicinity must have been splashed by the child, but they all looked completely impassive and unconcerned. One could hardly blame Kitagawa for being disgusted if the audience at Takarazuka consisted of such

THE WISDOM OF CHARLOTTE BRONTË
 Thoughts Gathered from Her Novels
 CHARLOTTE BRONTË, EDITED BY GRACE MILNE RAE, INTRODUCTION BY POLLY TEALE

- Beautiful gift for fans of classic literature
- Introduction by renowned director Polly Teale
- Features *Jane Eyre*

‘Cheerfulness is a matter which depends fully as much on the state of things within, as on the state of things without and around us.’

From *Jane Eyre* to *Lucy Snowe*, Charlotte Brontë’s heroines think deeply on how to live a fulfilling life, often expressing passionate beliefs, heartfelt advice and pragmatic philosophy. This inspirational selection of short quotations, revealing their – and their author’s – innermost thoughts on early Victorian times, remains surprisingly relevant to us today. Drawn from *Jane Eyre*, *Villette*, *Shirley* and *The Professor*, the quotations cover a wide range of themes including happiness, love, feminism, work, truth, feelings and prejudice. This thought-provoking book, first published in 1912, is a delightful gift for anyone who loves to read Brontë’s novels.

DRAFT COVER

POWER, PROSPERITY & PLANET

THOM WOODROOFE

- **Speaks directly to everyday Australians, not just policymakers and reframes climate action around power bills, jobs and quality of life**
- **Connects climate change to national prosperity and economic security, linking climate policy to foreign affairs, trade and long-term national strategy**
- **Tackles anxiety about fossil fuel dependence and economic transition and positions Australia as at a global turning point ahead of COP31**
- **Timely, policy-relevant and forward-looking, it will appeal to business, government and general readers alike**

After nearly two decades of ‘the climate wars’, arguments for climate action focus on power (we must decarbonise our energy system), prosperity (we must develop our green industries and clean tech) and planet (we must do more to keep global temperature increases within safe limits). But rarely are these arguments framed in terms of the impact on ordinary Australians. How will the transition to renewables keep electricity prices low for households? Given our continued reliance on fossil fuel exports, can Australia avoid falling off an economic cliff in the coming decades, compromising quality of life? What will it cost our nation if large swathes of the country are at risk of climate-related disaster?

In this clear-sighted volume, Woodroffe argues that Australia needs to elevate climate change to our top foreign and economic policy priority.

THE DIGITAL CHILD

Creating Confident Children

LELIA GREEN

- **Written by one of Australia’s leading experts on children and digital media**
- **Timely and urgent in the wake of Australia’s social media ban; offers reassurance as well as clear direction for uncertain parents**
- **Evidence-based guidance for parents navigating screen time and online safety**
- **Challenges simplistic ‘screens are bad’ narratives with nuanced findings**
- **Draws on global research networks including EU Kids Online and DigiLitEY; informed by work with UNESCO Asia-Pacific on digital literacy and child wellbeing**

For almost all parents, most of the time, digital parenting is a recipe for uncertainty and concern.

Digital media is sometimes blamed for stunting early language development; other times it’s lauded for supporting children’s language and imaginations. Restricting access is thought to protect children, but research suggests that fostering responsible internet use is more effective. What is the way forward, through the dire warnings and doubts? Is there a possible policy reset that allows parents to worry less?

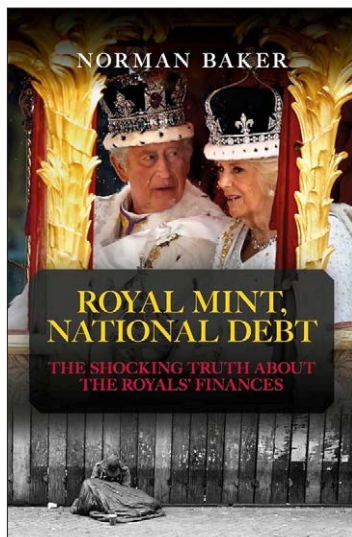

In the wake of Australia’s social media ban, Lelia Green draws on many years of research into digital parenting to examine online safety and screen time in the digital age.

ROYAL MINT, NATIONAL DEBT

The shocking truth about the royals' finances
NORMAN BAKER

- **This glorious sequel to the bestselling ... *And What Do You Do?* goes even deeper in its analysis of royal finances, examining where the money comes from, how it is used and what has changed with the arrival of a new King and a new Prince of Wales**

In his irreverent and uncompromising bestseller ... *And What Do You Do?*, former Minister of State and Privy Counsellor Norman Baker laid bare what the British royal family didn't want us to know, namely its extravagant use of public money and general bad behaviour.

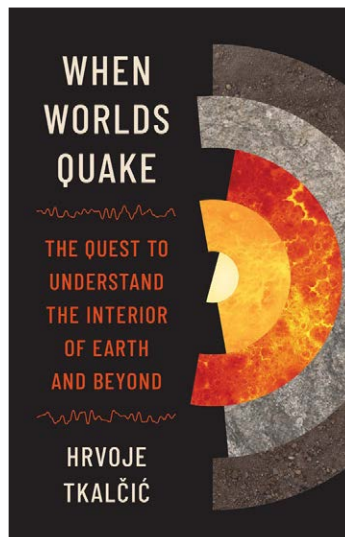

This sensational sequel goes even deeper in its analysis of royal finances, examining where the money comes from, how it is used and what has changed with the arrival of a new king.

Amongst many other things, it reveals how a family that was effectively bankrupt in 1760 is now one of the richest in the country; how they lobby governments and the media to maximise their profits from the public purse; and how they take advantage of a uniquely beneficial tax and legislative regime.

Pulling no punches, this is the book the royal family really don't want you to read.

WHEN WORLDS QUAKE

The Quest to Understand the Interior of Earth
and Beyond
HRVOJE TKALČIĆ

- **How earthquakes can reveal the subsurface secrets of our planet and other worlds**

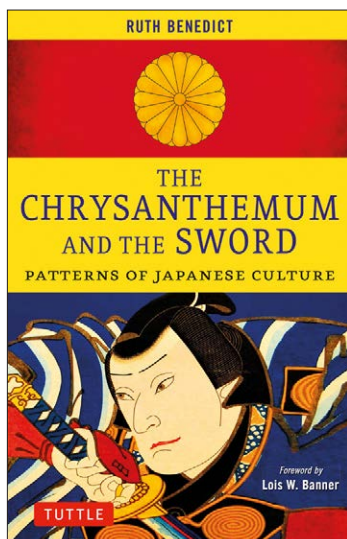

When Worlds Quake is a fascinating account of how scientists around the globe seek to use quakes to answer tantalising questions about the structure and inner dynamics of our planet and to discover the deepest secrets of our nearest neighbours in the solar system.

Briefly traversing the history of seismology, Hrvoje Tkalčić describes the women and men who sought to understand major seismic events – from the catastrophic 1556 Shaanxi earthquake and the San Francisco earthquake and fire of 1906 to more recent events such as the 2020 earthquakes in Tkalčić's native Croatia – and thus shaped the field. Modern global seismologists now not only study the behaviour of earthquakes but also use seismic waves as tools to image Earth's deep interior. To do this work, they need seismographs positioned around the globe, including in remote, challenging regions. Tkalčić takes the reader along on his own daring expeditions to install seismographs and collect seismic wave data from the wilds of the Australian Outback to the rough depths of the Southern Ocean, and even farther afield – to the Moon and Mars, where quakes can be used to image the interiors of these worlds.

THE CHRYSANTHEMUM AND THE SWORD

Patterns of Japanese Culture

RUTH BENEDICT, FOREWORD BY LOIS W. BANNER

- **A new edition of the classic study of Japanese culture by Ruth Benedict, the eminent anthropologist, with a new foreword by Lois W. Banner**
- **Benedict clearly explains the complexities of Japanese values, rituals and attitudes, and although it was published right after WWII, it is famous still today for its even-handed and insightful approach**
- **A post-war bestseller in Japan – now available globally**

First published in 1946, *The Chrysanthemum and the Sword* is renowned for its insights into Japanese culture – examining social structure, family roles, self-discipline, and other enduring values – and has shaped decades of cross-cultural discourse by showing how these elements have persisted amid sweeping modernisation.

This masterpiece remains unsurpassed in its keen observations about Japanese culture. By shedding light on the core values that make the Japanese unique, it reveals a great deal about culture in general and provides a lens through which to view ourselves.

This new edition has been completely redesigned for greater readability and features a new foreword by Lois Banner, a pioneer in the field of women’s studies.

A Memoir of the Forbidden and the Fabulous
MAJID PARSA

- **LGBTQ+ memoir: narrative non-fiction about LGBTQ+ life in Iran, with both a heartbreaking and humorous tone**
- **Wide readership, relating to all kinds of readers battling religious conflict with sexuality, gender identity, family, romance, etc**

An unflinching memoir about growing up in a country where homosexuality is punishable by death, and yet underground, hidden from Sharia law, is a vibrant gay scene threatening to burst open.

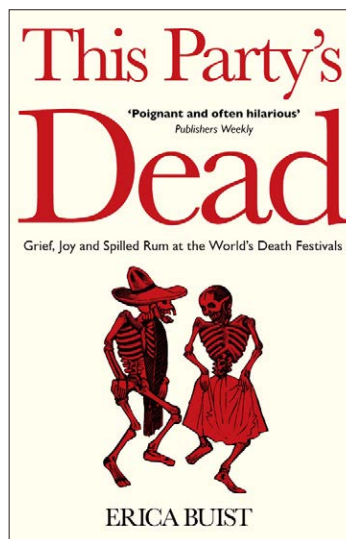

The dawn prayer calls echo through the streets. As many make their way to mosques, for some it signals the end of another illegal gay party. Under the cover of darkness, smiles on lips and sweat on foreheads, the gays of Tehran blend back into daily life. Hidden in plain sight, they plan when and where they will meet again.

In an unparalleled true story, Majid Parsa recounts how a childhood of war, prayer and obedience was upended by a teenage sexual awakening and ultimately, pride. He lifts the heavy veil of persecution to reveal the fabulous and flamboyant gay scene right at the heart of the Islamic Republic of Iran, flourishing under the ever-present shadow of the grand Ayatollah and morality police.

THIS PARTY'S DEAD

Grief, Joy and Spilled Rum at the World's Death Festivals
ERICA BUIST

- **Now in paperback!**
- **Healing and insightful: Anyone recovering from the death of a parent or grandparent will take solace in this touching exploration of rituals from around the world**

What if we responded to death...by throwing a party? Journalist Erica Buist travels to seven death festivals around the world (Nepal, Madagascar, Indonesia, Sicily, Japan, Mexico and New Orleans)

By the time Erica Buist's father-in-law Chris was discovered, upstairs in his bed, his book resting on his chest, he had been dead for over a week. She searched for answers (the artery-clogging cheeses in his fridge?) and tried to reason with herself (does daughter-in-law even feature in the grief hierarchy?) and eventually landed on an inevitable, uncomfortable truth: everybody dies.

From Mexico to Nepal, Sicily, Thailand, Madagascar, Japan and finally Indonesia – with a stopover in New Orleans, where the dead outnumber the living ten to one – *This Party's Dead* is the account of her journey to understand how other cultures deal with mortal terror.

Behrooz Ghamari explores the history of US intervention in the region, focusing on the continuing sanctions imposed on Iran and, behind them, US policymakers’ persistent perception of the Islamic Republic as a major obstacle to American power.

US GRAND STRATEGY AND THE MADMAN THEORY

From Nixon to Trump
JAMES D. BOYS

- Contextualises Trump's foreign policy in the correct stream of US history
- Contributes to an understanding of Trump's approach to power politics
- Explains the political relationship between Nixon and Trump
- Reveals the unexplained basis for Trump's dealings with foreign leaders

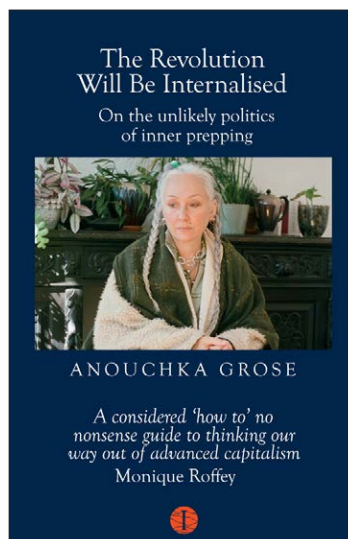

US grand strategy and the Madman Theory: From Nixon to Trump explores how U.S. presidents have used calculated unpredictability as a tool of foreign policy – and the dangers that come with it. Richard Nixon pioneered the tactic, projecting a volatile persona to pressure adversaries like North Vietnam and the Soviet Union into concessions, hoping they'd fear he was unhinged enough to go nuclear.

Decades later, Donald Trump revived the approach in his own chaotic, improvisational style, leveraging erratic behaviour to keep both allies and enemies off balance. While Nixon's version was tightly controlled and behind the scenes, Trump's was a public spectacle, blurring strategy with impulsiveness. This book examines how both leaders weaponised perception to gain leverage, and what that reveals about power, psychology, and leadership on the world stage.

THE REVOLUTION WILL BE INTERNALISED

On the unlikely politics of inner prepping
ANOUCHKA GROSE

- Grose takes us on an exhilarating, funny, erudite and ultimately uplifting tour of the practices she tried out, including ego-dismantling retreats, animal communication, and tantra, offering myriad ways to revolutionise ourselves and others

Anouchka Grose, a leading psychotherapist specialising in climate anxiety, was in general happy with her London life which included a glamorous partner, a teenager, even a spare room.

But, shaken by the apparent futility of Western activism in the face of inertia and corruption, she began to question her choices, both material and emotional. Instead of seeking outward answers she went inwards, creating an alternative Eat, Pray, Love for the polycrisis.

Inner prepping, or altering your private, interior world as a form of civil resistance, is an oblique way of coming at the classic feminist idea that the personal is political.

'Reporting in from the fringes of radical communities and ideas, she gives us theory and action, a considered 'how to', no nonsense guide to thinking our way out of advanced capitalism. Plus she's funny, clever and wise, self aware and also, deeply committed to changing how she and all of us live our precious lives.' – Monique Roffey, author of *The Mermaid of Black Conch*

IN PRAISE OF GOOD BOOKSTORES

JEFF DEUTSCH

- **Now in paperback!**
- **Backlist highlight!**
- **From a devoted reader and lifelong bookseller, an eloquent and charming reflection on the singular importance of bookstores**

Do we need bookstores in the twenty-first century? If so, what makes a good one? In this beautifully written book, Jeff Deutsch – the former director of Chicago’s Seminary Co-op Bookstores, one of the finest bookstores in the world – pays loving tribute to one of our most important and endangered civic institutions. He considers how qualities like space, time, abundance, and community find expression in a good bookstore. Along the way, he also predicts – perhaps audaciously – a future in which the bookstore not only endures, but realises its highest aspirations.

In exploring why good bookstores matter, Deutsch draws on his lifelong experience as a bookseller, but also his upbringing as an Orthodox Jew. This spiritual and cultural heritage instilled in him a reverence for reading, not as a means to a living, but as an essential part of a meaningful life. Central among Deutsch’s arguments for the necessity of bookstores is the incalculable value of browsing – since, when we are deep in the act of looking at the shelves, we move through space as though we are inside the mind itself, immersed in self-reflection.

BFFS

The Radical Potential of Female Friendship
ANAHIT BEHROOZ

- **Pocket size pop culture: a new series introducing readers to cutting-edge zeitgeist and subculture topics they may only have an inkling about**
- **‘Girlhood culture’ has dominated pop culture in the last two years, with the importance of female friendship being celebrated and recognised**

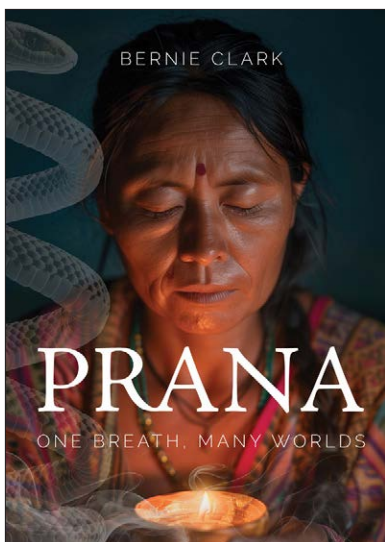

***BFFs* shows us that friendships can be the most important, loving, expansive, and emancipatory relationships in our lives – all with the help of our favourite TV, movie, and book besties.**

Friendship can be the foundation of our earliest memories and the source of our most formative moments. So why is it often seen as secondary to romantic or familial connection, something we age out of and sacrifice to other relationships? In *BFFs*, Anahit Behrooz considers female friendship not as something lesser, but as a site of radical intimacy.

From the joys of shared coming-of-age stories and sisterhood, through the pain of break-ups and parting of ways, the vast significance and intensity of feeling within our friendships is explored through depictions in the work of Toni Morrison and Elena Ferrante, *Booksmart* and *Grey’s Anatomy*, *Insecure*, *The Virgin Suicides* and beyond.

THE TROUBLE WITH FREEDOM

Love, hate and America's future

MELISSA BUTCHER

- **Available now!**
- **Presents a valuable outsider's perspective on the polarisation of US society and politics**
- **Based on on-the-ground reporting, structured around conversations with a wide range of Americans: Democrat and Republican, gay and straight, urban and rural, immigrants, First Nations, Black, white, the incarcerated and more**

An illuminating account of how Americans have been divided by the very value that unites them.

America today is being torn apart by the struggle over a single concept, deeply rooted in the country's sense of self: freedom. Battered by wave after wave of crises, ordinary people of all political persuasions have come to feel that their freedom is under threat – and with it, nothing less than the soul of the nation.

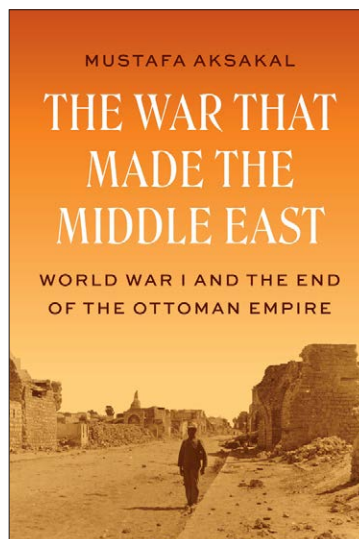

In *The trouble with freedom*, journalist and researcher Melissa Butcher takes a trip into the ferociously polarised world of American politics, hoping to find out what's going on beneath the surface.

What she discovers is that political conflict is often the outcome of very personal experiences of managing cultural change. Exploring the different ways freedom has been used to define what it means to be American, Butcher encounters anger and distrust.

THE WAR THAT MADE THE MIDDLE EAST

World War I and the End of the Ottoman Empire

MUSTAFA AKSAKAL

- **A new history that tells the story of how European imperial ambitions destroyed the Ottoman Empire during the Great War and created a divided and unstable Middle East**

The Ottoman Empire's collapse at the end of the First World War is often treated as a foregone conclusion. It was only a matter of time, the story goes, before the so-called Sick Man of Europe succumbed to its ailments – incompetent management, nationalism, and ethnic and religious conflict. In *The War That Made the Middle East*, Mustafa Aksakal overturns this conventional narrative. He describes how European imperial ambitions and the Ottoman commitment to saving its empire at any cost – including the destruction of the Armenian community and the deaths of more than a million Ottoman troops and other civilians – led to the empire's violent partition and created a politically unstable Middle East.

The War That Made the Middle East shows that, until 1914, the Ottoman Empire was a viable multiethnic, multireligious state, and that relations between the Arabs, Jews, Muslims, and Christians of Palestine were relatively stable. A sweeping narrative of war, great power politics, and ordinary people caught up in the devastation, *The War That Made the Middle East* offers new insights about the Great War and its profound and lasting consequences.

COLD WAR ON FIVE CONTINENTS

A Global History of Empire and Espionage

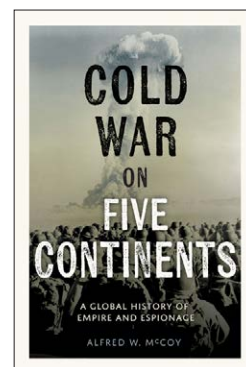

ALFRED W. MCCOY

- After Russia's invasion of Ukraine, and China's increasing influence on the geopolitical stage, commentators are asking this question more frequently
- Rooted in decades of research, McCoy makes an enlightened intervention in this discussion to show how little commentators know about the character of the Cold War, the way it ended, and how it has prepared the ground for current geopolitical rivalries

A provocative analysis of the deadly Cold War conflicts that devastated countries and communities far from Moscow and Washington.

Transforming battlegrounds in Africa, Asia, and Latin America into veritable hellscape, the surrogate wars of the Cold War era left behind a legacy of collective trauma and social conflict that have persisted into the present.

**WHAT WOULD YOU DO ALONE IN A CAGE WITH NOTHING BUT COCAINE?**

A Philosophy of Addiction

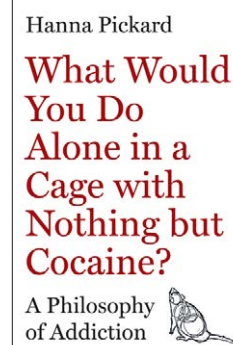

HANNA PICKARD, ILLUSTRATED BY MARCO VENNIRO

- A revolutionary new paradigm for understanding addiction

Why do people with addiction use drugs self-destructively? Why don't they quit out of self-concern? Why does the rat in the experiment, alone in a cage, press the lever again and again for cocaine – to the point of death? In this pathbreaking book, Hanna Pickard proposes a new paradigm for understanding the puzzle of addiction. For too long, our thinking has been hostage to a false dichotomy: either addiction is a brain disease, or it is a moral failing. Pickard argues that it is neither, and that both models stifle addiction research and fail people who need help.

Drawing on her expertise as an academic philosopher and her clinical work in a therapeutic community, Pickard explores the meaning of drugs for people with addiction and the diverse factors that keep them using despite the costs.

The History of an Enigma

OLIVIER HEIN

- **Uncovers the little known events that shaped not only Borneo but whole Malay Archipelago**

A fun and fascinating history of an island best known for tropical rainforests and captivating wildlife – but with a much bigger story to tell.

The world's third-largest island, and the only one administered by three different sovereign nations, Borneo is something of a mystery. Home to an incredibly diverse indigenous population, once infamous for headhunting; a hotbed of military activity during World War II; a poster child for the ecological movement even as its rainforest is destroyed; and the host of Indonesia's planned new capital city, Nusantara – Borneo's past, present and future are nothing if not eclectic.

THE INVENTION OF THE FUTURE

A History of Cities in the Modern World, 1st edition

BRUNO CARVALHO

- **A kaleidoscopic and original new history of urbanisation – from Lisbon to New York, Paris to Rio de Janeiro, and Buenos Aires to Lagos**

For the past three centuries, urban dwellers and planners have imagined future cities that would be radically different from those of the past. Planners pursued progress, whether focused on flying vehicles above, sewage systems below, or daily life in between. Yet, as Bruno Carvalho shows in this original and wide-ranging history, which features some sixty illustrations, modern cities continuously defied predictions. Visionary designs and technological innovations created dramatic, unforeseen outcomes, and the ongoing urban boom is a story of continuity as well as rupture.

THE DEATH AND LIFE OF GENTRIFICATION

A New Map of a Persistent Idea, 1st edition

JAPONICA BROWN-SARACINO

- **A provocative account of what is gained and what is lost when a word that once narrowly referred to neighbourhood change takes on a life all its own**

Sociologist Ruth Glass coined the term *gentrification* in the 1960s to mark the displacement of working-class residents in London neighbourhoods by the professional classes. *The Death and Life of Gentrification* traces how the word has far outgrown Glass's meaning, becoming a socially charged metaphor for cultural appropriation, upscaling, and the loss of authenticity.

In this lively and insightful book, Japonica Brown-Saracino traces how a concept originally intended to describe the brick-and-mortar transformation of neighbourhoods has come to characterise transformations that have little to do with cities.

OLYMPIA

A Cultural History

PROFESSOR JUDITH M. BARRINGER

- **A comprehensive and richly illustrated history of one of the most important athletic, religious, and political sites in the ancient Greek and Roman world**

The memory of ancient Olympia lives on in the form of the modern Olympic Games. But in the ancient world, Olympia was renowned for far more than its athletic contests. In *Olympia*, Judith Barringer provides a comprehensive and richly illustrated history of one of the most important sites in the ancient Greek and Roman world, where athletic competitions took place alongside – and were closely connected with – crucial religious and political activities.

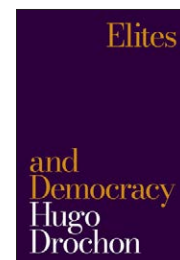

Barringer describes the development of the Altis, the most sacred area of Olympia, where monuments to athletes successful in the games joined those erected to the gods and battlefield victories.

ELITES AND DEMOCRACY

HUGO DROCHON

- **Why elites always rule democracies – and why recognising that reality can help us respond to the crisis of democracy today**

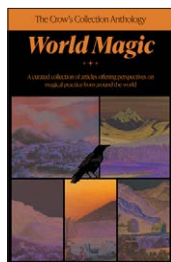

A central paradox of democracies is that they are always ruled by elites. What can democracy mean in this context? Today, it is often said that a populist revolt against elites is driving democratic politics throughout the West. But in *Elites and Democracy*, Hugo Drochon argues that democracy is more accurately and usefully understood as a perpetual struggle among competing elites – between rising elites and ruling elites. Real political change comes from the interaction between social movements and elite political institutions such as parties. But, although true democracy – the rule of the people – may never be achieved, striving towards it can bring about worthwhile democratic results.

THE CROW'S COLLECTION ANTHOLOGY: WORLD MAGIC

CREATED BY CROSSED CROW BOOKS

- **The first in a series of Crossed Crow anthologies**
- **Provides a broad view of global magical practices beyond Wicca and Paganism, spanning countries on five continents**

A voyage through the world's magical practices.

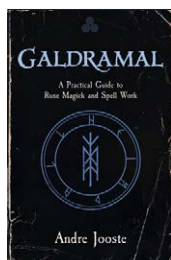

Landscapes influence our cultural practices as much as the people who create them, and magic is no stranger to this effect. Magic is omnipresent in our world, but many people who practice don't call it 'magic'. Thanks to stigmatisation, disavowal, and punishment for magical work, as well as christo-colonialism, many non-Wiccan or Pagan practices have gone unseen in the contemporary occult community. Crossed Crow Books' first-ever anthology, *The Crow's Collection of World Magic*, collects ten essays by writers and practitioners around the world about their magical practices, histories, and communities.
